Architecture As A Translation Of Music Pamphlet Architecture 16:

Pamphlet Architecture 16: Architecture as a Translation of Music Elizabeth Martin, 1994 Pamphlet Architecture was begun in 1977 by William Stout and Steven Holl as an independent vehicle for dialogue among architects and has become a popular venue for publishing the works and thoughts of a younger generation of architects Small in scale low in price but large in impact these books present and disseminate new and innovative theories The modest format of the books in the Pamphlet Architecture Series belies the importance and magnitude of the ideas within *Pamphlet Architecture 15: War and Architecture* Lebbeus Woods, 1993 War and Architecture is a timely and moving response by architect Lebbeus Woods to the bombing of Sarajevo With text in both English and Croatian accompanied by the author's exquisitely drawn hauntingly beautiful proposals the book is both dedicated and addressed to the citizens of this ravaged city Lebbeus Woods has long been fascinated by the intimate ties between architecture and violence He identifies the two predominant patterns for rebuilding cities following catastrophic destruction restoring the city exactly to its previous historical state or erasing the remains of the city to construct a new utopia These he argues are twin forms of denial Woods draws an analogy to the process of biological and emotional healing presenting architectural forms that act as injections scabs scars and new tissue within the complex organism of a city Only by facing the insanity of willful destruction he argues can reason begin to believe again in itself **Pamphlet Architecture 29** Nannette Jackowski, Ricardo de Ostos, 2013-07-02 Ambiguous Spaces the newest installment in the Pamphlet Architecture series and a return to Pamphlet's own progressive roots features the architectural fictions The Pregnant Island and Nuclear Breeding These two projects develop alternative urban concepts that address the challenges presented by the specific situations and social dynamics described in controversial locations such as the Brazilian Tucuruí Dam the Three Gorges Dam in China and former English nuclear test sites Using narrative techniques fictional programs ambiguous spaces and building devices Ambiguous Spaces explores people communities and even entire cities oppressed by a lack of freedom The Sound Studies Reader Jonathan Sterne, 2012-11-12 The Sound Studies Reader blends recent work that self consciously describes itself as sound studies along with earlier and lesser known scholarship on sound from across the humanities and social sciences The Sound Studies Reader touches on key themes like noise and silence architecture acoustics and space media and reproducibility listening voices and disability culture community power and difference and shifts in the form and meaning of sound across cultures contexts and centuries Writers reflect on crucial historical moments difficult definitions and competing accounts of the role of sound in culture and everyday life Across the essays readers will gain a sense of the range and history of key debates and discussions in sound studies The collection begins with an introduction to welcome novice readers to the field and acquaint them the main issues in sound studies Individual section introductions give readers further background on the essays and an extensive up to date bibliography for further reading in sound studies make this an original and accessible guide to the field Contributors Rick Altman Jacques
