The Battle for Home: The Vision of a Young Architect in Syria Marwa al-Sabouni, 2016-05-17 An architect's gripping account of living and working in war-torn Syria and the role architecture plays in whether a community crumbles or comes together. Drawing on the author's personal experience of living and working as an architect in Syria, this timely and fascinating account offers an eyewitness perspective on the country's bitter conflict through the lens of architecture, showing how the built environment and its destruction hold up a mirror to the communities that inhabit it. From Syria's tolerant past with churches and mosques built alongside one another in Old Homs and members of different religions living harmoniously together, the book chronicles the recent breakdown of social cohesion in Syria's cities. With the lack of shared public spaces intensifying divisions within the community and corrupt officials interfering in town planning for their own gain, these actions are symptomatic of wider abuses of power. With firsthand accounts of mortar attacks and stories of refugees struggling to find a home, *The Battle for Home* is a compelling explanation of the personal impact of the conflict and offers hope for how architecture can play a role in rebuilding a sense of identity within a damaged society.

Upstate Cauldron Joscelyn Godwin, 2015-03-06 A guide to the phenomenal crop of prophets, cults, and utopian communities that arose in Upstate New York from 1776 to 1914. From 1776 to 1914, an amazing collection of prophets, mediums, sects, cults, utopian communities, and spiritual leaders arose in Upstate New York. Along with the best known of these, such as the Shakers, Mormons, and Spiritualists, this book explores more than forty other spiritual leaders or groups, some of them virtually unknown but all of them fascinating. The author uncovers common threads that characterize these homegrown spiritualities, including roots in Western esoteric traditions, liberation from the psychological pressures of dogmatic Christianity, a preoccupation with sex and involvement in the radical reform movements of the day. In addition to maps and photographs of surviving buildings and monuments, the book also features a gazetteer of sites listing 150 locations connected to these groups, which may be used as a helpful travel guide to the region. The dean of alternative spiritual history produces one of his central and most thoughtful works in *Upstate Cauldron*. This book is more than a cauldron; it is a melting pot into which Joscelyn Godwin blends the diffuse and complex religious movements that once converged in Upstate New York to show how we became a modern civilization indelibly stamped by the experience of spiritual outsiders. This is both splendid history and a book of wonders in uncovering lost fragments of our world. Throw away your highlighter because you won't know where to stop. Mitch Horowitz, author of *Occult America*, *White House Sances*, *Ouija Circles*, *Masons and the Secret*, *Mystic History of Our Nation*. What a fascinating book! *Upstate Cauldron* takes a refreshing and new look at the period of time when Upstate New York was the center of the Spiritualist movement in America. Joscelyn Godwin has written a book that is very difficult to put down, introducing us to the most wonderful and exotic individuals. People like Timothy Brown, who built one of the most intricate and most photographed homes in Central New York.

least understood parts of the Western esoteric traditions The traditional secrecy of lodge organisations has made it next to impossible for modern students of magic to learn what magical lodges do and how their powerful and effective traditions of ritual symbolism and organisation can be put to work This updated and expanded edition of Inside a Magical Lodge reveals the foundations of lodge work on all levels from the framework of group structure that allows lodges to efficiently handle the practical needs of a working magical group through the subtle approaches to symbolism and ritual developed within lodge circles to the potent magical methods that lodges use in their initiations and other ceremonial workings **The Builder**, 1898 *Play Among Books* Miro Roman, Alice_ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science
