Arne Svenson The Neighbors:

The Neighbors David Ebony, 2015 The Neighbors the latest project from photographer Arne Svenson born 1952 began when he inherited a telephoto bird watching lens from a friend and began to record the quotidian activities of his neighbors in the glass walled apartment building across the street from his Manhattan studio Completely unstaged and taken without his subjects knowledge the images capture his neighbors framed by the structure of their own windows in their unguarded moments taking a nap eating breakfast talking on a cell phone Simultaneously tender and voyeuristic Svenson s carefully composed photographs have been compared to scenes from Vermeer and Edward Hopper but the series has also sparked controversy and debate since it was first exhibited in August 2013 at a moment of acute national anxiety over surveillance and privacy After extensive international press attention The Neighbors series is collected here for the first time in a beautiful clothbound volume Landmark Cases in Privacy Law Paul Wragg, Peter Coe, 2023-02-23 This new addition to Hart

s acclaimed Landmark Cases series is a diverse and engaging edited collection bringing together eminent commentators from the United Kingdom the United States Australia Canada and New Zealand to analyse cases of enduring significance to privacy law The book tackles the conceptual nature of privacy in its various guises from data protection to misuse of private information and intrusion into seclusion It explores the practical issues arising from questions about the threshold of actionability the function of remedies and the nature of damages The cases selected are predominantly English but include cases from the United States because of the formative influence of United States privacy jurisprudence on the development of privacy law Australia Canada the Court of Justice of the European Union and the European Court of Human Rights Each chapter considers the reception and application and in some instances rejection outside of the jurisdiction where the case was decided **Urban Emotions and the Making of the City** Katie Barclay, Jade Riddle, 2021-04-06 This book brings

together a vibrant interdisciplinary mix of scholars from anthropology architecture art history film studies fine art history literature linguistics and urban studies to explore the role of emotions in the making and remaking of the city By asking how urban boundaries are produced through and with emotion how emotional communities form and define themselves through urban space and how the emotional imaginings of urban spaces impact on histories identities and communities the volume advances our understanding of urban emotions into discussions of materiality power and embodiment across time and space

The First Amendment Bubble Amy Gajda, 2015-01-05 For decades privacy took a back seat to the public's right to know But as the Internet and changing journalism have made it harder to distinguish news from titillation U S courts are showing new resolve in protecting individuals from invasive media scrutiny As Amy Gajda shows this judicial backlash is now impinging on mainstream journalists

Is It Ours? Martha Buskirk, 2021-04-13 If you have tattoos who owns the rights to the imagery inked on your body What about the photos you just shared on Instagram And what if you are an artist responding to the surrounding landscape of preexisting cultural forms Most people go about their days without thinking much about intellectual property but it shapes all aspects of contemporary life It is a constantly moving target articulated through a web of laws that are different from country to country sometimes contradictory often contested Some protections are necessary not only to benefit creators and inventors but also to support activities that contribute to the culture at large yet overly broad ownership rights stifle innovation *Is It Ours* takes a fresh look at issues of artistic expression

and creative protection as they relate to contemporary law Exploring intellectual property particularly copyrights Martha Buskirk draws connections between current challenges and early debates about how something intangible could be defined as property She examines bonds between artist and artwork including the ways that artists or their heirs retain control over time The text engages with fundamental questions about the interplay between authorship and ownership and the degree to which all expressions and inventions develop in response to innovations by others Most importantly this book argues for the necessity of sustaining a vital cultural commons

Beyond Privacy Sille Obelitz S e, Tanja Wiehn, Rikke Frank J rgensen, Bjarki Valt ysson, 2025-01-23 Discussions around digital technologies new media platforms and information have long centred on the protection of personal data and privacy This timely volume extends the conversation to address fundamental societal and structural issues from three perspectives people practices and politics Organised around an international collection of case studies the book provides a valuable contribution to our understanding of the challenges of privacy in the digital sphere from emerging regulatory programmes to surveillance capitalism and big tech companies Taking a multidisciplinary approach this is a new and innovative perspective on our datafied societies that goes beyond privacy It will be a key resource for scholars and students of communication and media studies and science and technology studies
