The Arrangement 17 Holly M. Ward, 2014-11-02 There are choices that change a life forever I know with complete certainty my life would have been very different if I d chose another path But I didn t I chose Sean **Parental Rights and Responsibilities** Stephen Gilmore, 2017-07-05 This volume represents key scholarship on the issue of parental rights and responsibilities selected from a dense forest of literature The collection offers an overview of the subject and covers topics such as underlying rationales of who or what is a parent legal concepts of parent and their linkage the legal parent accommodating complexity the nature and scope of parental rights shared parental responsibility and parental rights and the state **Federal Law Review** , 2006 Parents and Children Andrew Bainham, 2017-03-02 This volume brings together some of the best journal articles of the last twenty years which deal with various aspects of the relationship between parents and children Adopting an inter disciplinary and comparative approach the book reproduces articles from a variety of journals in law and the social sciences The book is divided into eight parts dealing respectively with becoming a parent the status and obligations of parenthood issues of upbringing adolescence child support parental separation divorce and children child abuse and state intervention social parenthood and adoption The volume includes a substantial introduction by the editor

Optical Fiber Sensor Technology L.S. Grattan, B.T. Meggitt, 2013-03-09 Environmental and chemical sensors in optical fiber sensor technology The nature of the environment in which we live and work and the precarious state of many aspects of the natural environment has been a major lesson for scientists over the last few decades Public awareness of the issues involved is high and often coupled with a scepticism of the ability of the scientist and engineer to provide an adequate or even rapid solution to the preservation of the environment before further damage is done and to achieve this with a minimum of expenditure Monitoring of the various aspects of the environment whether it be external or internal to ourselves and involving chemical physical or biomedical parameters is an essential process for the well being of mankind and of the individual Legis lative requirements set new standards for measurement and control all around us which must be met by the most appropriate of the technologies available commensurate with the costs involved Optical fiber sensor technology has a major part to play in this process both to complement existing technologies and to promote new solutions to difficult measurement issues The developments in new sources and detectors covering wider ranges of the electromagnetic spectrum with higher sensitivity allow the use of techniques that some time ago would have been considered inappropriate or lacking in sufficient sensitivity **A Demographic Perspective on Gender, Family and Health in Europe** Gabriele

Doblhammer, Jordi Gumà, 2018-02-12 This open access book examines the triangle between family gender and health in Europe from a demographic perspective It helps to understand patterns and trends in each of the three components separately as well as their interdependencies It overcomes the widely observable specialization in demographic research which usually involves researchers studying either family or fertility processes or focusing on health and mortality Coverage

looks at new family and partnership forms among the young and middle aged their relationship with health and the pathways through which they act Among the old lifelong family biography and present family situation are explored Evidence is provided that partners advancing in age start to resemble each other more closely in terms of health with the health of the partner being a crucial factor of an individual's own health Gender specific health outcomes and pathways are central in the designs of the studies and the discussion of the results The book compares twelve European countries reflecting different welfare state regimes and offers country specific studies conducted in Austria Germany Italy all populations which have received less attention in the past and Sweden As a result readers discover the role of different concepts of family and health as well as comparisons within European countries and ethnic groups It will be an insightful resource for students academics policy makers and researchers that will help define future research in terms of gender and public health

Intermetallic Chemistry Riccardo Ferro, Adriana Saccone, 2011-08-26 Intermetallic science is closely related to physics chemistry metallurgy materials science technology and engineering This book emphasizes the chemical aspects of this science and therefore the mutual reactivity of metals and the characteristics of intermetallic compounds Topics included are Phase diagrams of alloy systems Many intermetallic systems form several compounds generally not obeying common simple stoichiometric rules which are often homogeneous in a certain range of compositions The stability and extension of these phases are conveniently presented through phase diagrams Selected aspects of intermetallics structural chemistry with emphasis on the solid state The general structural characteristics of intermetallic phases are considered with attention to nomenclature and to alternative and complementary methods of presenting crystal chemical data A brief account is given of derivative and degenerate structures modular aspects of crystal structures and of a few special groups of alloys such as quasicrystals and amorphous alloys A number of selected structural prototypes with typical features their possible grouping in structural families and their distribution among different types of alloys are provided Intermetallic reactivity trends in the Periodic Table Attention is given to a few selected elemental parameters such as electron configuration and valence electron number and to their changes along the Table which act as reference factors of the intermetallic behaviour As an example the relationships are considered between crystal structure and the number of valence electrons per atom or per formula in various classes of compounds or solid solution phases Alloying behaviour systematics of intermetallic systems with a description of the intermetallic reactivity of each element or group of elements in the order of their position in the Periodic Table For each pair of metallic elements their capability to form intermediate phases is summarised by maps and schemes A description of small scale preparation methods of intermetallics A number of interesting and significant peculiarities are e.g. those related to their high melting points insolubility in common solvents etc Systematic treatment of alloying behaviour Wide overview of intermetallic chemistry Illustrated with many examples

Concepts and Strategies for Combating Social Exclusion Jordi Estivill, 2003 Millions of human beings the world over survive in conditions of poverty and social exclusion

and this is unlikely to change in the years to come This grave situation affects the whole of humanity which cannot and must not shut its eyes to it Social exclusion is spreading so much that it is becoming one of the keys to understanding the economic and social situation of the world today This book attempts to decipher the concept of social exclusion It aims to identify analyse and measure exclusion and make it more visible It also aims to provide a detailed overview of those involved and their initiatives
