Culture, Community, and Development Rhonda Phillips, Mark A. Brennan, Tingxuan Li, 2020-02-03 Culture is a living thing In social settings it is often used to represent entire ways of life including rules values and expected behavior Varying from nation to nation neighborhood to neighborhood and beyond even in the smallest localities culture is a motivating factor in the creation of social identity and serves as a basis for creating cohesion and solidarity This book explores the intersection of culture and community as a basis for locally and regionally based development by focusing on three core bodies of literature theory research and practice The first section theory uncovers some of the relevant historical arguments as well as more contemporary examinations Continuing the research section sheds light on some of the key concepts variables and relationships present in the limited study of culture in community development Finally the practice section brings together research and theory into applied examples from on the ground efforts During a time where the interest to retain the uniqueness of local life traditions and culture is significantly increasing in community based development the authors offer a global exploration of the impacts of culturally based development with comparative analysis in countries such as Korea Ireland and the United States A must read for community development planners policymakers students and researchers

Public History in Global Perspective Georgina Laragy, Richard Legay, Ciaran O'Neill, Hannah K. Smyth, 2025-07-21 Where should public history sit within the matrix of global international trans national and more local histories Since its emergence in the 1970s Public History has typically been read as community oriented and more local in its applications The academic field in particular has developed along national lines and indeed we see in the many monographs edited books and journals that have emerged a distinct tendency to consider public history as understandable mostly in its relation to the nation state and its attendant mythologies The meta narratives that public history pushes against are the building blocks of national histories political military and heroic histories Conceiving of a global public history seems to have more radical potential than an international public history which arguably simply collects these national histories What would a global public history look like and how can it disrupt the field if interpreted radically This book will centre the work of scholars and professionals in the field of Public History It will offer novel reflections on postgraduate Public History learning work experience and application from recent graduates and partnered institutions A mix of theory and practice traditional and creative methodologies it demonstrates the value of integrating work experience practitioner workshops and close collaboration in Public History training

Sustainability in Art, Fashion and Wine Annamma Joy, 2024-03-18 The art fashion and wine industries are currently at various stages in their efforts to embrace and transition towards sustainability While sustainability commitments are a necessary condition for progress they are not sufficient Instead there is a need for sweeping transformative change that includes giving serious consideration to indigenous worldviews without recolonizing them Sustainability in Art Fashion and Wine includes findings

from recent research and contributes to a new understanding of familiar concepts such as sustainability de colonization and corporate responsibility in the art fashion and wine industries by adopting critical lenses and incorporating them with innovative perspectives on circular business models and digitalization It endeavors to present remedies for effectively combating climate change and promoting social good While discussing specific issues such as sub contracted labor safe working conditions living wages environmental degradation mismanaged waste and more the book argues that recognizing the significant role western colonization has played and continues to play in the developing world in our current conception of capitalism is itself unsustainable To understand the true meaning of sustainability to fully recognize the looming deadlines we face in combating the climate crisis and instituting sustainability as a new normal the acceptance of a new conception of capitalism one antithetical to colonization and exploitation is required Contributors to this book address these issues by applying a critical studies approach to their respective chapters allowing the book to set out what real sustainability could and should look like in the art fashion and wine industries
