Kiley, 2015 Napoleonic artillery can usually be divided into two types field or light artillery which was employed by the armies on campaign and in the field and siege or heavy artillery which was employed in siege operations and against opponents holding the fortresses against them While field artillery consisted of calibers up to and including 12 pounders light enough to keep up with an army on the march and in combat siege artillery was of the heavier calibers and intended as battering pieces which could destroy fortifications through bombardment Similar garrison artillery

was mounted on different gun carriages and employed to counter the siege operations and siege artillery of the opposing forces. Serving alongside the artillery men, the engineer arm displayed its expertise in the various operations needed to take or defend a fortress. Naval artillery would along with the skill and seamanship of the naval officers and ratings who worked the ships determine who would be victorious at sea. Naval guns were generally of two types: guns and carronades and ranged in caliber from relatively small 9 pounders to 32 pounders for guns and even larger calibers for the short ranged and deadly carronades. This volume chronicles the story of the guns and men during the twenty three years of almost continuous warfare from 1792-1815 from the battlefields of continental Europe to the almost primitive terrain of North America and of the seas, lakes and rivers that connected them.

ARTILLERY OF THE NAPOLEONIC WARS. KEVIN F. KILEY, 2017 *Artillery Equipments of the Napoleonic Wars* Terence Wise, 1979-11-08. In the first half of the 18th century the French had been the European leaders in artillery, possessing the only standardized range of pieces. These pieces were sturdy but extremely heavy. This book shows how at the beginning of the Seven Years War 1756-1763 Austria seized the lead by introducing new light field pieces: the 3pdr, 6pdr and 12pdr guns and some excellent light howitzers. Other powers adopted this new system, however no complete overarching methodology existed until the implementation of the Gribeauval system which was to revolutionise the artillery of Europe and make possible the highly efficient field artillery of the Napoleonic Wars 1799-1815.

Napoleon's German Artillery Paul Lindsay Dawson, 2011-06-10. First study of Napoleon's German artillery.

Napoleonic Artillery Paul L. Dawson, Anthony L. Dawson, Stephen Summerfield, 2008-05-15. The Napoleonic Wars gripped Europe and beyond for over ten years at the beginning of the Nineteenth century. Hundreds of battles were fought between the armies of France and its allies and all those powers that wished to see Napoleon Bonaparte stopped in his tracks and an end to the French Empire. The battles and sieges of the Napoleonic Wars which cost the lives of between 3 and 6 million men made unprecedented use of large guns and every participating army possessed a range of artillery. With the wars covering such a long period of time and with so many armies involved the subject of Napoleonic artillery is a complicated one and no work has attempted to examine all the weapons involved in a single detailed volume. Until now. The product of years of research, this book presents most of what is known about the artillery pieces of the Napoleonic Wars. Including numerous drawings, contemporary illustrations and modern photographs of surviving guns, it will be an invaluable addition to the library of historians, modellers, wargamers and re-enactors.
