Frank, 2017-07-05 A fresh contribution to the

ongoing debate between Kunstwissenschaft scientific study of art and Kunstgeschichte art history this essay collection explores how German speaking art historians of the late nineteenth and early twentieth century self consciously generated a field of study Prominent North American and European scholars provide new insights into how a mixing of diverse methodologies took place in order to gain a more subtle and comprehensive understanding of how art history became institutionalized and legitimized in Germany One common assumption about early art historical writing in Germany is that it depended upon a simplistic and narrowly defined formalism This book helps to correct this stereotype by demonstrating the complexity of discussion surrounding formalist concerns and by examining how German speaking art historians borrowed incorporated stole and made analogies with concepts from the sciences in formulating their methods In focusing on the work of some of the well known fathers of the discipline such as Alois Riegl and Heinrich Wölfflin as well as on lesser known figures the essays in this volume provide illuminating and sometimes surprising treatments of art history's prior and understudied interactions with a wide range of scientific orientations from psychology sociology and physiognomics to evolutionism and comparative anatomy
