Manufacturers: Austin Motor Co., Ltd., Longbridge, G.P.O. Box 41, Birmingham.

ALTHOUGH it was introduced at the 1951 Earls Court Motor Show, this model did not reach full production until the latter part of 1952. It bears a strong family likeness to the larger A40 and A70 models, but differs fundamentally in having integral construction of chassis and body. The independent front suspension units on either side are bolted directly to body extensions which form the front wing valances, and a hypoid bevel rear axle is used. The car is as completely equipped as the larger models, having provision for built-in heater and radio.

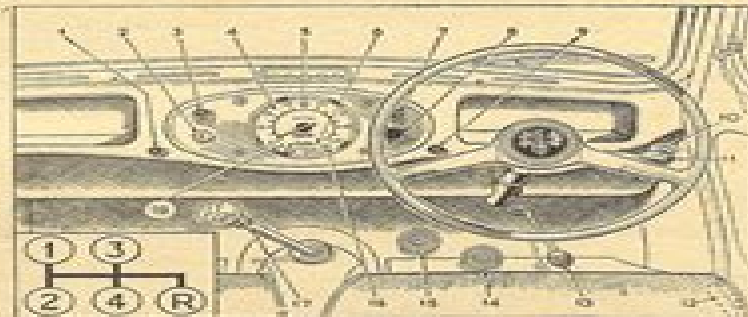

Since the Seven was put into production there have been few engineering changes affecting service and, as the first large production batch went to Austin dealers as demonstration cars, most of the modifications will have been carried out on earlier cars.
