Terence M. Yhip, Bijan M. D. Alagheband, 2020-02-25 This book provides a comprehensive treatment of credit risk assessment and credit risk rating that meets the Advanced Internal Risk Based AIRB approach of Basel II Credit risk analysis looks at many risks and this book covers all the critical areas that credit professionals need to know including country analysis industry analysis financial analysis business analysis and management analysis Organized under two methodological approaches to credit analysis a criteria based approach which is a hybrid of expert judgement and purely mathematical methodologies and a mathematical approach using regression analysis to model default probability the book covers a cross section of industries including passenger airline commercial real estate and commercial banking In three parts the sections focus on hybrid models statistical models and credit management While the book provides theory and principles its emphasis is on practical applications and will appeal to credit practitioners in the banking and investment community alongside college and university students who are preparing for a career in lending *Self-Help, Private Debt Collection and the Concomitant Risks*

Cătălin Gabriel Stănescu, 2015-08-25 The book shows that self help in commercial law is a fast inexpensive and efficient alternative to court enforcement Self help remedies and private debt collection are largely but not exclusively features of common law jurisdictions since remnants of private enforcement can still be found in contract law in civilian systems The book argues that despite their usefulness self help and private debt collection entail significant risks especially for consumer debtors This means that private enforcement needs to be accompanied by the introduction of tailor made consumer debtor protection regulation Specific attention is given to factoring which functions in many instances as a form of pseudo private debt collection and which has been exploited to bypass sector specific consumer protection regulations **Commercial Real Estate Financing**, 2004 Managing Bank Risk Morton Glantz, 2003 Featuring new credit engineering tools
