

A twelve cylinder is the pinnacle of engine design, and traditionally a hallmark of luxury class cars in particular. The first-generation A8 was available with an engine of this type from 2001 onwards, and a more advanced version could be obtained from 2004 onwards in the following model series. Audi's engineers have now thoroughly revised the W12, increasing its displacement to 6.3 litres and equipping it with petrol direct injection for higher power and efficiency.

The 6.3l W12 FSI engine gives the long-wheelbase Audi A8 "10" sportscar-like performance; it sprints from zero to 100 kph in just 4.9 seconds; the electronically governed top speed of 250 kph is a mere formality.

The engine runs exceptionally smoothly, and only at high engine loads and speeds do the car's occupants sense any of this supreme power at work.

For use in the long-wheelbase A8 "10", Audi's engineers have converted the W12 engine to FSI petrol direct injection. This involved extensive modification of the cylinder heads.

The high fuel economy of the 6.3l W12 FSI engine compared with its competitors is mainly a result of technologies from Audi's modular efficiency platform – which is used throughout the A8 model line.
