Germany, 1517-1648 Allyson F. Creasman, 2016-04-15 The history of the European Reformation is intimately bound up with the development of printing With the ability of the printed word to distribute new ideas theologies and philosophies widely and cheaply early modern society was quick to recognise the importance of being able to control what was published Whilst much has been written on censorship within Catholic lands much less scholarship is available on how Protestant territories sought to control the flow of information In this ground breaking study Allyson F Creasman reassesses the Reformation's spread by examining how censorship impacted upon public support for reform in the German cities Drawing upon criminal court records trial manuscripts and contemporary journals mainly from the city of Augsburg the study exposes the networks of rumour gossip cheap print and popular songs that spread the Reformation message and shows how ordinary Germans adapted these messages to their own purposes In analysing how print and oral culture intersected to fuel popular protest and frustrate official control the book highlights the limits of both the reformers's influence and the magistrates's authority The study concludes that German cities were forced to adapt their censorship policies to the political and social pressures within their communities in effect meaning that censorship was as much a product of public opinion as it was a force acting upon it

As such this study furthers debates not only on the spread and control of information within early modern society but also with regards to where exactly within that society the impetus for reform was most strong *The Negotiated Reformation* Christopher W. Close, 2009-09-30 Utilizing evidence from numerous imperial cities this book offers an explanation for the spread and survival of urban reform during the sixteenth century By analyzing the operation of regional political constellations it reveals a common process of negotiation that shaped the Reformation in the Holy Roman Empire It reevaluates traditional models of reform that leave unexplored the religious implications of flexible systems of communication and support among cities Such networks influenced urban reform in fundamental ways affecting how Protestant preachers moved from city to city as well as what versions of the Reformation city councils introduced This fusion of religion and politics meant that with local variations negotiation within a regional framework sat at the heart of urban reform The Negotiated Reformation therefore explains not only how the Reformation spread to almost every imperial city in southern Germany but also how it survived imperial attempts to repress religious reform *Unbuilt Utopian Cities 1460 to 1900: Reconstructing their Architecture and Political Philosophy* Tessa Morrison, 2016-03-09 Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature Some of the works examined are very well known such as Tommaso Campanella's *Civitas Solis* while others such as Joseph Michael Gandy's *Designs for Cottages* are relatively obscure However even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author's political philosophy It reconstructs the cities through a 3 D computer program ArchiCAD using Artlantis to render Plans sections elevations and perspectives are presented for each of the cities The ten cities are Filarete's *Sforzina* Albrecht Dürer's *Fortified Utopia* Tommaso Campanella's *The City of the Sun* Johann Valentin Andreae's *Christianopolis* Joseph Michael Gandy's *An Agricultural Village* Robert Owen's *Villages of Unity and Cooperation* James Silk Buckingham's *Victoria* Robert Pemberton's *Queen Victoria Town* King Camp Gillette's *Metropolis* and Bradford Peck's *The World a Department Store* Each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city Although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society The book is structured in two parts *The Holy Roman Empire* Brian A. Pavlac, Elizabeth S. Lott, 2019-06-01 Reference entries overview essays and primary source document excerpts survey the history and unveil the successes and failures of the longest lasting European empire The Holy Roman Empire endured for ten

centuries This book surveys the history of the empire from the formation of a Frankish Kingdom in the sixth century through the efforts of Charlemagne to unify the West around A D 800 the conflicts between emperors and popes in the High Middle Ages and the Reformation and the Wars of Religion in the Early Modern period to the empire s collapse under Napoleonic rule A historical overview and timeline are followed by sections on government and politics organization and administration individuals groups and organizations key events the military objects and artifacts and key places Each of these topical sections begins with an overview essay which is followed by alphabetically arranged reference entries on significant topics The book includes a selection of primary source documents each of which is introduced by a contextualizing headnote and closes with a selected general bibliography
