Research Companion to Media Geography Paul C. Adams, Jim Craine, 2016-03-23 This Companion provides an authoritative source for scholars and students of the nascent field of media geography While it has deep roots in the wider discipline the consolidation of media geography has started only in the past decade with the creation of media geography's first dedicated journal *Aether* as well as the publication of the sub discipline's first textbook However at present there is no other work which provides a comprehensive overview and grounding By indicating the sub discipline's evolution and hinting at its future this volume not only serves to encapsulate what geographers have learned about media but also will help to set the agenda for expanding this type of interdisciplinary exploration The contributors leading scholars in this field including Stuart Aitken Deborah Dixon Derek McCormack Barney Warf and Matthew Zook not only review the existing literature within the remit of their chapters but also articulate arguments about where the future might take media geography scholarship The volume is not simply a collection of individual offerings but has afforded an opportunity to exchange ideas about media geography with contributors making connections between chapters and developing common themes
