conceptualised is followed by an analysis of the workings of stigma within the sphere of social welfare. The focus then turns to a consideration of the way specific groups and their allies have challenged their stigmatised status and in the process have utilised and developed our understanding of the theoretical, political and practical ways in which stigma operates within society. In paying particular attention to mental health, disability and transgender politics, the book highlights both the progressive and regressive aspects of theoretical and practical campaigns to challenge stigma. In particular, it gives warning as to the way such developments often exhibit a marked disdain for the public and have become institutionalised in such a way as to constitute a threat to our political freedom.
