A Place Of Healing Working With Suffering In Living And Dying

A Place Of Healing Working With Suffering In Living And Dying:

A Place of Healing Michael Kearney, 2000 One of the most significant healthcare advances in the latter part of the twentieth century has been the development of the specialty of palliative care The specialty traditionally draws on the successes of the Western medical model in developing innovative means of controlling pain where cure is not possible The author of this book argues that while the medical model of palliative care has undoubted strengths in easing pain that there are nevertheless limitations In particular while its practitioners are undoubtedly dedicated to the alleviation of suffering the model itself is limited in its ability to alleviate the psychological and spiritual suffering that often accompanies terminal illness and thus in helping patients in their total experience of illness Drawing on the ancient rites of Asklepiian healing Dr Kearney looks at the mythology underlying this model and examines the contemporary relevance of these ideas in terms of healthcare and education He concludes by proposing a new model for the healing of suffering in healthcare which draws on the best practice of both traditions

Mortally Wounded Michael Kearney, 1996 Kearney shows readers that they can learn to die well whole healed and accepting Sharing his own case studies Kearney examines how many patients overcome their soul pain He shows the importance of inner or depth work and explains how he has helped or failed to help the dying Ultimately readers learn that there are no easy answers diagrams throughout

Caregiver Stress and Staff Support in Illness, Dying and Bereavement Irene Renzenbrink, 2011-03-24 The need for renewal and support for those who care for seriously ill dying and bereaved people has been acknowledged from the very beginning of the hospice and palliative care movement While often referring to the rewards and satisfactions of the work Dame Cicely Saunders was the first to acknowledge that helping encounters with dying patients and distressed relatives could be a source of anguish and grief for dedicated and compassionate carers Caregiver Stress and Staff Support in Illness Dying and Bereavement discusses the challenge of finding a balance between the support needs of patients families and staff and the resources available With contributions from practitioners and researchers from around the world this book recognizes that palliative care today is being provided in many different settings and that there may be wide variations in the way individuals and organizations identify and manage the stressors that arise through the work This unique collection of international perspectives on the complexities and management of caregiver stress and staff support builds on the firm foundation Mary Vachon built over thirty years ago in her studies yet broadens the scope to include significant social political and cultural variations on the theme

The Dying Patient in Psychotherapy Joy Schaverien, 2020-04-16 *The Dying Patient in Psychotherapy* is a powerful account of love and death within a psychotherapeutic relationship The narrative traces one man's journey in psychotherapy and that of the analyst who accompanies him The full length description of an analysis demonstrates the developmental path of an erotic transference from its origins in infancy through fantasies of sex and violence to mature erotic intimacy The countertransference is considered with exceptional honesty as the analysis intensifies following the diagnosis of a life

Withholding and withdrawing treatment Euthanasia and assisted suicide Terminal sedation The role of autonomy Palliative care Drawing on a philosophical framework the author explores end of life issues in order to reflect on the nature of the good death and how this may be achieved The book considers whether it is permissible or desirable to influence the quality of dying offering palliative sedation as a possible alternative to terminal sedation the argument is extended to examine why some forms of assisted dying can be shown to be compatible with the ideas of palliative care Consideration is also given to future developments such as life extension techniques and the ethical questions that these techniques might raise As such the book follows in the ongoing philosophical tradition to critique and analyse current thought on the topic of death encouraging self reflection in the reader and offering suggestions for practice in end of life care Death's Dominion is key reading for students and professionals involved in care of the dying as well as those with an interest in the philosophical issues surrounding end of life care
