Obler, 1968 **Scientific American**, 1958 **Reading Lessons in Seeing** Michael A.

Chaney, 2017-02-17 Literary scholar Michael A Chaney examines graphic novels to illustrate that in form and function they inform readers on how they ought to be read His arguments result in an innovative analysis of the various knowledges that comics produce and the methods artists and writers employ to convey them Theoretically eclectic this study attends to the

lessons taught by both the form and content of today's most celebrated graphic novels Chaney analyzes the embedded lessons in comics and graphic novels through the form's central tropes the iconic child storyteller and the inherent childishness of comics in American culture the use of mirrors and masks as ciphers of the unconscious embedded puzzles and games in otherwise story driven comic narratives and the form's self reflexive propensity for showing its work Comics reveal the labor that goes into producing them embedding lessons on how to read the work as a whole Throughout Chaney draws from a range of theoretical insights from psychoanalysis and semiotics to theories of reception and production from film studies art history and media studies Some of the major texts examined include Marjane Satrapi's Persepolis Chris Ware's Jimmy Corrigan The Smartest Kid on Earth Joe Sacco's Palestine David B's Epileptic Kyle Baker's Nat Turner and many more As Chaney's examples show graphic novels teach us even as they create meaning in their infinite relay between words and pictures
