Breaking Free Sol Stern, 2003 The first book to transform school choice from an abstract policy issue into a question of basic personal freedom and indeed for minority children at the bottom of the social ladder into a question of survival

School Choice William H. Jeynes, 2014-04-25 Are public charter schools more effective than traditional public schools This book provides quantitative evidence to answer this question and considers a better way to undertake a policy of school choice School Choice A Balanced Approach is the most comprehensive examination of traditional public schools public charter schools and faith based schools that has ever been undertaken By considering and comparing the overall data on these three types of educational systems it provides insight on likely outcomes of school choice programs The author's objective is not to advance any particular agenda but rather to provide readers with an unbiased analysis of research that has been embraced by both the G W Bush and Obama administrations that will allow for fresh thinking and the betterment of American education as a whole Author William H Jeynes PhD asks vital questions regarding the school choice issue that are often overlooked Which specific programs of school choice are likely to work and which would likely fail Is school choice really a boon for the private sector How might the implementation of school choice programs increase or decrease the financial burden on government budget deficits This book carefully addresses a relevant topic that ultimately affects every American making it essential reading for everyone from government officials and educators to students and the general public **A Time for Governing** Yuval Levin, Meghan Clyne, 2012-05-08 America finds itself in a moment of profound and complex governing challenges A crushing recession followed by a feeble recovery have shaken the foundations of our financial and economic system We are struggling with the exploding costs of health care and entitlement spending and fiscal disaster looms as our society ages American families are anxious about wage stagnation barriers to social mobility and the nation's competitiveness in an era of globalization Meanwhile our large governing institutions most of them designed several decades ago are showing signs of strain and decay calling out for serious reform National Affairs a quarterly journal of essays on domestic policy and political economy was launched in 2009 to help Americans think more clearly about these problems and to develop promising solutions This book is a collection of some of the most timely and concrete policy proposals published in the journal's pages offering ideas for reforming our welfare state our tax system financial regulation monetary policy education state finances and more Each essay was written by a prominent expert in the field the authors are all notable right leaning academics policy experts former government officials or think tank scholars with national reputations The book thus comprises a ready made domestic policy agenda for conservative policymakers including a Republican president should one be elected in 2012 based on the latest and best thinking from the world of conservative policy intellectuals It will be the only resource of its kind in this election year a one stop shop for conservative policy ideas A Class Apart Alec Klein, 2008-08-12 Klein presents a riveting account of the students and teachers at perhaps the best public high school in the country New York

City's Stuyvesant High School and the enormous academic pressures placed on them Fighting for the Freedom to Learn
James V. Shuls, Neal P. McCluskey, 2025-11-11 The school choice movement is often seen as a modern partisan undermining of a cherished institution public education Fighting for the Freedom to Learn sets the record straight revealing that the struggle for educational freedom is as old as America itself and rooted in a deep and enduring tradition of parents and communities shaping how children learn With contributions from 12 leading education scholars this is a sweeping history of school choice in the United States From Pennsylvania's 1802 policy funding poor families to attend schools of their choice to 19th century town tuitioning programs in Vermont and Maine to the post COVID school choice explosion Americans have long supported publicly backed educational options beyond government run schools Other highlights include the vital role of private initiatives in providing education to black Americans denied access to public schools the long legal campaign for educational freedom and more This book makes clear that wanting school choice is not a recent or radical idea but a consistent thread in the American story For educators policymakers historians and parents Fighting for the Freedom to Learn offers a powerful reminder Educational freedom like liberty itself is not a new trend it's a founding principle

Education Transformation Ron Packard, 2013-11-19 Education Transformation authored by the leading expert in customized online education Ron Packard shows why technology is critical to the future of education and the future of our nation's children We can no longer afford to lag the benefits of technology must be harnessed for the benefit of students nationwide and around the globe It is an imperative One size does not fit all in education Education Transformation shows us how technology can be used to accommodate individual's needs rather than making each student force fit into the traditional classroom model which works for many but not for all Like so many other modern conveniences education can benefit from technological advancement and only technology can provide personalized instruction affordably Education Transformation has never been needed more than today It is the future of education and of our nation's children **Ms. Moffett's First Year** Abby Goodnough, 2009-04-28 In summer of 2000 legal secretary Donna Moffett answered an ad for the New York City Teaching Fellows program which sought to recruit talented professionals from other fields to teach in some of the city's worst schools Seven weeks later she was in a first grade classroom in Flatbush Brooklyn nearly completely unprepared for what she was about to face New York Times education reporter Abby Goodnough followed Donna Moffett through her first year as a teacher writing a frontpage award winning series that galvanized discussion nationwide Now she has expanded that series into a book that through the riveting story of Moffett's experiences explores the gulf between the rhetoric of education reform and the realities of the public school classroom Ms Moffett's First Year is neither a Hollywood friendly tale of one person making a difference nor a reductive indictment of the public education system It is rather a provocative portrait of the inadequacy of good intentions of the challenges of educating poor and immigrant populations and of a well meaning but underprepared woman becoming a teacher the hard way While the story takes place in New York Ms Moffett's first year is a

metaphor for the experiences of teachers everywhere in America one that illuminates the philosophical economic political and ideological dilemmas that have come more and more to determine their experience and their students experiences in the classroom

Sick Schools David V. Anderson, 2020-01-10 Who s afraid of for profit education Those who work in non profit or government owned and operated schools Many parents and other stakeholders have been made fearful by this education establishment What s more important to humans nutrition or education Nutrition is more important because it is the prerequisite for other human activities including education What

organizations provide food and who pays for the food Food is provided by for profit farmers for profit processors for profit wholesalers and for profit retailers Most food is purchased with the consumers own money but a significant amount is purchased by low income individuals using food stamps Why can t education be provided similarly using education stamps We trust for profit enterprises to provide our food Why can t we trust for profit enterprises to provide K 12 education Fearmongers have frightened us and made us into gullible compliant socialists who despise commercial activities in education Go to the supermarket and ponder its marvelous array of foods and then contemplate how a for profit K 12 education sector would please and amaze its customers
