Bridgeport Ct Postcard History Series:

Bridgeport Andrew Pehanick, 2009 *Bridgeport 1900 1960* presents a fascinating look into the history of Bridgeport through vintage postcards from the city's formative years. These vintage postcards depict the change and expansion in Bridgeport during the 20th century from the growth of the University of Bridgeport from a small junior college into a major university to the changes in transportation from the horse and buggy to early automobiles and trolley cars. Bridgeport's waterfront played an important role in the development of the city, drawing visitors and wealthy residents who built homes along the shore. Following the two world wars, the city saw a large population increase and a building boom soon followed. Factories and homes were built, retail stores moved in, and recreational options increased to serve the needs of the thousands of people who came to Bridgeport seeking employment. Fairfield and Southport in Vintage Postcards Beth L.

Love, 2000-08-09 Fairfield including its village of Southport is steeped in tradition and is rich in history. Many people who call this coastal Connecticut community home already know that Fairfield was founded in 1639 by Roger Ludlow and was visited in 1789 by Pres. George Washington who actually spent the night at the Sun Tavern. However, do they also know the history of Pulpit Rock or for that matter could they locate it? What about the granite planter at the junction of Main Street, Center Street, and Harbor Road? Do they know the story behind that? Those residents who remember Fairfield when as well as those with a desire to learn more about Fairfield when will be fascinated by Fairfield and Southport.

Building the Transcontinental Railroad Kelly Wittmann, 2017-07-15 A railroad across the United States was once thought to be nearly impossible. The vast expanse from the Pacific to the Atlantic Oceans had so many obstacles including towering mountain ranges and broad rivers. However, the 1862 Pacific Railroad Act tasked two railroad companies, the Central Pacific and the Union Pacific, with building a transcontinental railroad to link the coasts. How they managed to meet finally in 1869 is the important account detailed in this well-researched volume. Readers will learn about key characters such as engineer Theodore Judah and investor Leland Stanford and the innovations and technologies that made their extraordinary feat a reality. Circus World Andrea

Ringer, 2024-07-09 From the 1870s to the 1960s, circuses crisscrossed the nation providing entertainment. A unique workforce of human and animal laborers from around the world put on the show. They also formed the backbone of a tented entertainment industry that raised new questions about what constituted work and who counted as a worker. Andrea Ringer examines the industry-wide circus world, the collection of shows that traveled by rail, wagon, steamboat, and car, and the traditional and nontraditional laborers who created it. Performers and their onstage labor played an integral part in the popularity of the circus. But behind the scenes, other laborers performed the endless menial tasks that kept the show on the road. Circus operators regulated employee behavior both inside and outside the tent, even as the employees themselves blurred the line between leisure and labor until, in all parts of the show, the workers could not escape their work. Illuminating and vivid *Circus World* delves into the gender, class, and even species concerns within an extinct way of life. **Warman's**
