Representing Royalty Julia Kinzler, 2018-07-27 Since the early days of cinema filmmakers have been intrigued by the lives and loves of British monarchs The most recent productions by ITV and Netflix show that the fascination with British royalty continues unabated both in Britain and around the world This book examines strategies of representing power and the staging of myths of power in seven popular films about British monarchs that were made after the mid 1990s revival of the royal biopic genre By combining approaches from cultural studies with concepts and theories from the humanities such as film studies and art history it offers a comprehensive understanding of the cinematic portraits of royalty In addition the volume opens up new perspectives on how meaning is generated in films about the monarchy and on the connections between the biographical narratives The introductory chapter to the case studies reviews the different academic positions on representations of royalty provides a toolkit for studying the subject and demonstrates ways to approach the films The book addresses questions of historical context and goes beyond a mere exploration of historical accuracy to reveal the films underlying ideological aims As such it makes a distinctive new contribution to the growing body of interdisciplinary work on the British monarchy in general and its cinematic representations in particular It is the first monograph about representational mechanisms of royal identities and British pasts in royal films such as *Elizabeth The Queen* and *The King's Speech*

Learning by Wandering Marie Martin, 2010 This book uncovers an ancient Irish perspective of learning and reconfigures it to offer a vitality restoring vision for education in our digital age Its aim is to help re-engage learners of the Net generation meaningfully and with enjoyment in the learning process The proliferation of new technologies in the classroom has generally not been accompanied by new pedagogical thinking and the discourse is still framed almost exclusively in terms of the utilitarian mindset of the Western world Consequently education is too often delivered within a context that is unfit for purpose The author argues that we need to bring the wisdom of different cultural perspectives to bear on our understanding of the nature and purpose of learning and on the role of technology in the learning process She shares an energising vision of education based on the ancient Irish understanding of learning as nourishment for the human spirit expressed as learning by wandering Illustrating the universal and timeless relevance of this understanding she demonstrates from personal experience how a synthesis of ancient wisdom and new technologies can transform the learning process This book offers a new dimension to the ongoing debate on the future of education in the Western world
