Social Neuroeconomics Jens Harbecke, Carsten Herrmann-Pillath, 2020-09-23 Neuroeconomics has emerged as a paradigmatic field where neuroscience and the social sciences are integrated in one analytical and empirical approach However the different disciplines involved often only relate to each other via the shared object of research and less through the constructing of precise models of integrative mechanisms Social Neuroeconomics explores the potential of philosophical and methodological reflections in the neurosciences and the social sciences to inform those efforts at cross disciplinary integration with a special focus on recent contributions to mechanistic explanations The collected essays are drawn from the fields of neuroscience psychology economics sociology and philosophy and examine the ways and methods of constructing unified conceptual frameworks that can guide empirical work and hypothesis building This is demonstrated in a range of applications particularly regarding finance and consumer behavior The concept of the social brain is also explored a multilevel framework in which complex
