Between Peace And War The Nature Of International Crisis:

Between Peace and War Richard Ned Lebow, 1981 Lebow has produced a significant work on international crises and their relationship to international politics His integration of history and international relations theory is particularly laudatory and he draws some important conclusions concerning deterrence theory and crisis management Jerel A Rosati American Political Science Review

Between Peace and War Richard Ned Lebow, 1984-02-01 When is war the result of a nation's deliberate decision to advance its vital interests by force of arms When is it brought about by miscalculation What causes policy makers to misjudge the consequences of their actions This book takes up these and other questions in a comparative study of the origins politics and outcomes of international crisis based on data from 27 historical cases *Bulletin of the Atomic Scientists*, 1982-10

Between Peace and War Richard Ned Lebow, 2020-08-31 This is an updated edition of the now classic original of the same title It has three new substantial chapters a prologue a chapter on new evidence on World War I and an epilogue The updated edition contains the now famous typology of international crisis the original critique of deterrence the emphasis on agency and the turn to political psychology to explain sharp departures from rational policy making The new chapters update and reevaluate these arguments and approach a critical hindsight assessment in light of post Cold War developments

War and Peace in International Rivalry Paul Diehl, Gary Goertz, 2010-06-02 This book provides the first detailed analysis of international rivalries the long standing and often violent confrontations between the same pairs of states The book addresses conceptual components of rivalries and explores the origins dynamics and termination of the most dangerous form of rivalry enduring rivalry since 1816 Paul Diehl and Gary Goertz identify 1166 rivalries since 1816 They label sixty three of those as enduring rivalries These include the competitions between the United States and Soviet Union India and Pakistan and Israel and her Arab neighbors The authors explain how rivalries form evolve and end The first part of the book deals with how to conceptualize and measure rivalries and presents empirical patterns among rivalries in the period 1816 1992 The concepts derived from the study of rivalries are then used to reexamine two central pieces of international relations research namely deterrence and democratic peace studies The second half of the book builds an explanation of enduring rivalries based on a theory adapted from evolutionary biology punctuated equilibrium The study of international rivalries has become one of the centerpieces of behavioral research on international conflict This book by two of the scholars who pioneered such studies is the first comprehensive treatment of the subject It will become the standard reference for all future studies of rivalries Paul F Diehl is Professor of Political Science and University Distinguished Teacher Scholar University of Illinois He is the coeditor of *Reconstructing Realpolitik* and coauthor of *Measuring the Correlates of War* Gary Goertz is Assistant Professor of Political Science University of Arizona and is the coauthor with Paul Diehl of *Territorial Change and International Conflict* *The Law of War* Ingrid Detter Delupis, 2000-09-28 Analysis of the changing legal context of modern warfare including developments over the last decade **Explaining the History of**

The Law of War Ingrid Detter, 2016-03-03 The third edition of Ingrid Detter's authoritative work explores the changing legal context of modern warfare in light of events over the last decade Ingrid Detter reviews the status of non State actors as individuals and groups become more prominent in international society Covering post 9 11 events and the resulting changes in the ethos of war the author analyses the role of military companies and examines what their legitimacy means for international society The edition also discusses certain intrinsic rules in the Law of War such as rules giving individuals the right to be spared genocide torture slavery and apartheid and assure them basic democratic rights The author questions the right of illegal combatants to be treated as prisoners of war and suggests that a minimum standard must be afforded to all whether captured dictators or detainees suspected of terrorism In the modern world the individual the soldier the civilian the dictator the terrorist or the pirate can no longer behave as they wish Further new topics include target killings the right to protect R2P claimed to be a new form of intervention the use of unregulated weapons such as drones and robots the war scenario in Outer Space and cyber crimes There is also a discussion of new developments in the field of war crimes including severe criticism of the novel concept joint criminal enterprise JCE which in the opinion of the author undermines the Rule of Law This updated and expanded edition will be of use to statesmen scholars and students of international relations and international law

The Law of War Ingrid Detter De Lupis, 2013 The third edition of Ingrid Detter's authoritative work explores the changing legal context of modern warfare in light of events over the last decade The new edition covers post 9 11 events and the resulting changes in the ethos of war It analyses the role of military companies sometimes authorised by States to act in war like situations and examines what their legitimacy means for international society The edition also discusses certain intrinsic rules in the Law of War such as rules giving individuals the right to be spared genocide torture slavery and at least nowadays apartheid and assure them basic democratic rights

We All Lost the Cold War Richard Ned Lebow, Janice Gross Stein, 1995-07-23 In the 1980s Soviet evidence suggests the Reagan arms buildup delayed rather than hastened the accommodation Gorbachev desired for internal

political reasons Both nations the authors argue expended lives and resources out of all reasonable proportion to their legitimate security interests with destabilizing consequences that persist today
