Bridging Heterogeneous And Homogeneous Catalysis Concepts Strategies And Applications:

Bridging Heterogeneous and Homogeneous Catalysis Can Li, Yan Liu, 2014-04-03 There are two main disciplines in catalysis research homogeneous and heterogeneous catalysis This is due to the fact that the catalyst is either in the same phase homogeneous catalysis as the reaction being catalyzed or in a different phase heterogeneous catalysis Over the past decade various approaches have been implemented to combine the advantages of homogeneous catalysis efficiency selectivity with those of heterogeneous catalysis stability recovery by the heterogenization of homogeneous catalysts or by carrying out homogeneous reactions under heterogeneous conditions This unique handbook fills the gap in the market for an up to date work that links both homogeneous catalysis applied to organic reactions and catalytic reactions on surfaces of heterogeneous catalysts As such it highlights structural analogies and shows mechanistic parallels between the two while additionally presenting kinetic analysis methods and models that either work for both homogeneous and heterogeneous catalysis Chapters cover asymmetric emulsion phase transfer supported homogeneous and organocatalysis as well as in nanoreactors and for specific applications catalytic reactions in ionic liquids fluoruous and supercritical solvents and in water Finally the text includes computational methods for investigating structure reactivity relations With its wealth of information this invaluable reference provides academic and industrial chemists with novel concepts for innovative catalysis research
