Gompers,2024-06-04 Financing the Entrepreneurial Venture focuses on financial management within entrepreneurial firms Most of these are young firms although some are more established The book examines these firms at all phases of their life cycle from the initial idea generation to the ultimate harvesting of the venture The book covers firms in a diverse set of industries including high technology low technology and services A significant fraction of the cases focus on non U S ventures Additionally the issues of gender and diversity are addressed in a number of settings **Natural Causes** Barbara Ehrenreich,2018-04-10 From the celebrated author of Nickel and Dimed Barbara Ehrenreich explores how we are killing ourselves to live longer not better A razor sharp polemic which offers an entirely new understanding of our bodies ourselves and our place in the universe Natural Causes describes how we over prepare and worry way too much about what is inevitable One by one Ehrenreich topples the shibboleths that guide our attempts to live a long healthy life from the importance of preventive medical screenings to the concepts of wellness and mindfulness from dietary fads to fitness culture But Natural Causes goes deeper into the fundamental unreliability of our bodies and even our mind bodies to use the fashionable term Starting with the mysterious and seldom acknowledged tendency of our own immune cells to promote deadly cancers Ehrenreich looks into the cellular basis of aging and shows how little control we actually have over it We tend to believe we have agency over our bodies our minds and even over the manner of our deaths But the latest science shows that the microscopic subunits of our bodies make their own decisions and not always in our favor We may buy expensive anti aging products or cosmetic surgery get preventive screenings and eat more kale or throw ourselves into meditation and spirituality But all these things offer only the illusion of control How to live well even joyously while accepting our mortality that is the vitally important philosophical challenge of this book Drawing on varied sources from personal experience and sociological trends to pop culture and current scientific literature Natural Causes examines the ways in which we obsess over death our bodies and our health Both funny and caustic Ehrenreich then tackles the seemingly unsolvable problem of how we might better prepare ourselves for the end while still reveling in the lives that remain to us
