The A to Z of Animation and Cartoons Nichola Dobson,2010-04-01 Animation was once a relatively simple matter using fairly primitive means to produce rather short films of subjects that were generally comedic and often quite childish However things have changed and they continue changing at a maddening pace One new technique after another has made it easier faster and above all cheaper to produce the material which has taken on an increasing variety of forms The A to Z of Animation and Cartoons is an introduction to all aspects of animation history and its development as a technology and industry beyond the familiar cartoons from the Disney and Warner Bros Studios This is done through a chronology an introductory essay photos a bibliography and over 200 cross referenced dictionary entries on animators directors studios techniques films and some of the best known characters [Automatic Generation of Computer Animation](#) Ruqian Lu,Songmao Zhang,2003-08-06 We are both fans of watching animated stories Every evening before or after d ner we always sit in front of the television and watch the animation program which is originally produced and shown for children We find ourselves becoming younger while immersed in the interesting plot of the animation how the princess is first killed and

then rescued how the little rat defeats the big cat etc But what we have found in those animation programs are not only interesting plots but also a big chance for the application of computer science and artificial intelligence techniques As is well known the cost of producing animated movies is very high even with the use of computer graphics techniques Turning a story in text form into an animated movie is a long and complicated procedure We came to the conclusion that many parts of this process could be automated by using artificial intelligence techniques It is actually a challenge and test for machine intelligence So we decided to explore the possibility of a full life cycle automation of computer animation generation By full life cycle we mean the generation process of computer animation from a children's story in natural language text form to the final animated movie It is of course a task of immense difficulty However we decided to try our best and to see how far we could go
