Handbook of Air Pollution Prevention and Control also includes free access to US EPA's air dispersion model SCREEN3. Detailed examples on the application of this important software to analyzing air dispersion from industrial processes and point sources are provided in the Handbook along with approaches to applying this important tool in developing approaches to pollution prevention and in selecting control technologies. By applying SCREEN3 along with the examples given in the Handbook, the user can evaluate the impact of processes and operations on air quality and apply the model to assess emergency scenarios to help in planning to develop environmental impact assessments to select pollution control technologies and to develop strategies for pollution prevention. Two companion books by Cheremisinoff are available: Handbook of Water and Wastewater Treatment Technologies and Handbook of Solid Waste Management and Waste Minimization Technologies. Uniquely combines prevention and control concepts while covering the practices and technologies that are applied to the prevention of air pollution in the chemicals manufacturing, oil and gas, iron and steel, and pharmaceutical industries and to the cleaning and control of industrial air emissions. Provides a bridge for today's environmental manager by focusing on an integrated approach to managing air pollution problems within industrial operations. Shows you how to calculate financial returns from pollution prevention projects. *User's manual for the RBLC data base*, S. Chand's Computer Science for Class 11 Dheeraj Mehrotra, Across All Boards
