

ADVANCED COMMON CORE MATH EXPLORATIONS

FACTORS MULTIPLES

1. Understand the relationship between multiplication and division. Use multiplication to check division, and use division to check multiplication.

2. Understand that a whole number is a product of two or more whole numbers. For example, the number 36 is a product of 4 and 9, so 4 and 9 are factors of 36. A factor of a whole number is a whole number that divides the whole number evenly.

3. Understand that every number has at least two factors: 1 and itself. Numbers that have only two factors are called prime numbers. Numbers that have more than two factors are called composite numbers.

4. Understand that for any two numbers, there is a smallest number that is a multiple of both of them. This number is called the least common multiple (LCM).
