Global Account Management H. David Hennessey, Jean-Pierre Jeannet, 2004-11-19 If you buy a new BMW you may be surprised as much by the owner's manual as by the car itself. Thin, personalized and containing information only on the features you have selected in the language you speak, it is the result of a year's collaboration with Xerox that has radically improved the product and decimated costs. It is just one example of the new organizational structures and processes being developed at leading companies to serve the global marketplace. As firms realize that dealing with global customers is not simply an extension of key account management, their most common response is to launch a formal global account management initiative. Done well, this is powerful and effective; however, without proper planning, it can spell disaster. Drawing on widely accepted key success factors for global account management as well as new elements revealed by their research, David Hennessey and Jean-Pierre Jeannet redefine the process of global account management around the premise that sustainable value springs only from an expert understanding of the customer's industry, its structure, and its strategy. The book covers all critical aspects of the topic: the planning process, account selection, team building, executive support, global IT requirements, compensation structures, and more, and draws on interviews with top global account managers at leading companies including IBM, Cable and Wireless, Siemens, HP, Guinness, Cisco, and Procter & Gamble. Accordingly, consumers should have easy access to understandable, relevant, and credible environmental information. Information about product characteristics is available in different forms and sources, but in many cases, relevant environmental information is not available on the product itself. The study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information. User manuals of passenger cars and refrigerators were focused on examining the advice which could diminish the harmful environmental effects of the use of these products. Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products. The study raised many ideas about actions that could promote the status and eco-development of instructions for use. **The Autocar**, 1987 **Recreational Boating** United States. Congress. House.
