V. Hamilton, 1925 *The Johns Hopkins University Circular* Johns Hopkins University, 1915 Includes University catalogues President s report Financial report registers announcement material etc Mortimer J. Adler, 2009-08-01 In this classic work Adler explores how man differs from all other things in the universe bringing to bear both philosophical insight and informed scientific hypotheses concerning the biological and behavioral characteristics of mankind Rapid advances in science and technology and the abstract concepts of that influence on man and human value systems are lucidly outlined by Adler as he touches on the effect of industrialization and the clash of cultures and value systems brought about by increased communication between previously isolated groups of people Among the other problems this study addresses are the scientific achievements in biology and physics which have raised fundamental questions about humanity s essential nature especially the discoveries in the biological relatedness of all living things Thrown into high relief is humanity s struggle to determine its unique status in the natural world and its value in the world it has created Ultimately Adler s work develops an approach to the separation between scientific and philosophical questions which stands as a model of thought on philosophical considerations of new scientific discoveries and its consequences for the human person *An Introduction to Neurology* Charles Judson Herrick, 1922 **Historical Perspectives and the International Status of Comparative Psychology** E. Tobach, 2013-05-13 Published in 1987 Historical Perspectives and the International Status of Comparative Psychology is a valuable contribution to the field of Psychology PP **The Relation of Overlearning to Retention** Noel Buford Cuff, 1927 **Contribution to Education**, 1927
