a source of Dutch nationalism or the role of minority languages in West European societies Section One of this volume contains essays that examine the terrain of the national imaginary through language monuments and visual culture Several of the essays in this traverse the cultural sites of representation and commemoration of the nation looking carefully at the politics of memory in places material objects and texts Section Two provides more individual case studies of nations though many of these essays engage significant regional and international tensions especially in a post Cold War world that has often influenced the internal dynamics of nation building Section Three moves the focus away from the nation to immigrant communities especially those in the United States Canada and the Caribbean Diasporas throughout the world have challenged many theories about the nation as crossing borders becomes the norm rather the exception *Vox Humana Craftsmanship* Girėnas Povilionis, Diego Cannizzaro, Rima Povilionienė, 2022-12-28 This book provides a thorough analysis focused on the sound expression produced by human crafted musical instrument a pipe organ in which various components blend into a complex whole to produce a wide range of timbres The sound produced by wooden and metal pipes of a variety of sizes is an integral part of the instrument s unique character while the organ stop is like its signature from which one can judge about the size and style of the instrument an organ building school or even an organ master to which it is attributable Precise identification of the name of the stop in accordance to both the pipework itself and the authentic inscriptions on the pipes is instrumental in investigating the geographic origins and authorship of an organ The monograph focuses on the craftsmanship of complex and historically influential organ stop Vox humana Its research and definition provides specific information distinguishing particular features in the variety of organ building traditions and discussing the differences in organ sound perception and production The volume is aimed at art and music historians as well as musicologists and scholars researching restoration techniques The book contains supplemental material with video and audio material as well as photo documentation of authentic Vox humana examples The material is placed in the online catalog which may be accessed by scanning the QR code in the appendix of the book dsgdsgds
