Vacca,2006-10-16 1 INTRODUCTION With the increasing deployment of wireless networks 802 11 architecture in enterprise environments IT enterprises are working to implement security mechanisms that are equivalent to those existing today for wire based networks An important aspect of this is the need to provide secure access to the network for valid users Existing wired network jacks are located inside buildings already secured from unauthorized access through the use of keys badge access and so forth A user must gain physical access to the building in order to plug a client computer into a network jack In contrast a wireless access point AP may be accessed from off the premises if the signal is detectable for instance from a parking lot adjacent to the building Thus wireless networks require secure access to the AP and the ability to isolate the AP from the internal private network prior to user authentication into the network domain Furthermore as enterprises strive to provide better availability of mission critical wireless data they also face the challenge of maintaining that data s security and integrity While each connection with a client a supplier or a enterprise partner can improve responsiveness and efficiency it also increases the vulnerability of enterprise wireless data to attack In such an environment wireless network security is becoming more important every day Also with the growing reliance on e commerce wireless network based services and the Internet enterprises are faced with an ever increasing responsibility to protect their systems from attack **Abuse**

Rosemarie Skaine,2015-04-21 This timely volume shows how abuse impacts every segment of society and how society is seeking effective ways to respond Abuse a key theme of health education curricula is also a major issue faced by many segments of society Intended for high school students as well as undergraduates and the general reader this comprehensive encyclopedia explores abuse in all its forms physical sexual emotional and verbal among a variety of age and demographic groups from children to the elderly to the disabled It sheds light on causes and symptoms of abuse examines lasting impacts and suggests avenues for prevention and treatment Specific topics of concern to a secondary school audience include

bullying and cyberbullying abuse of those in same sex relationships and sexual abuse through rape date rape incest and sexting Elder abuse which has become of greater concern as our society ages is covered as are domestic abuse child abuse and abduction Through up to date entries by expert contributors readers will learn about the causes and results of specific types of abuse as well as their legal and sociological dimensions The title will also serve as a gateway to further study and as a resource for readers seeking help
