Rethinking Education and Poverty William G. Renewing Our Rivers Mark K. Briggs, Waite R. Osterkamp, 2021-01-05. Our rivers are in crisis and the need for river restoration has never been more urgent. Water security and biodiversity indices for all of the world's major rivers have declined due to pollution, diversions, impoundments, fragmented flows, introduced and invasive species, and many other abuses. Developing successful restoration responses are essential. *Renewing Our Rivers* addresses this need head-on with examples of how to design and implement stream corridor restoration projects. Based on the experiences of seasoned professionals, *Renewing Our Rivers* provides stream restoration practitioners the main steps to develop successful and viable stream restoration projects that last. Ecologists, geomorphologists, and hydrologists from dryland regions of Australia, Mexico, and the United States share case studies and key lessons learned for successful restoration and renewal of our most vital resource. The aim of this guidebook is to offer essential restoration guidance that allows a start-to-finish overview of what it takes to bring back a damaged stream corridor. Chapters cover planning, such as emerging themes as climate change and environmental flow, the nuances of implementing restoration tactics, and monitoring restoration results. *Renewing Our Rivers* provides community members, educators, students, natural resource practitioners, experts, and scientists broader perspectives on how to move the science of restoration to practical success.

Transforming Conservation William J. Sutherland, 2022-12-07. There are severe problems with the decision-making processes currently widely used, leading to ineffective use of evidence, faulty decisions, wasting of resources, and the erosion of public and political support. In this book, an international team of experts provide solutions. The transformation suggested includes rethinking how evidence is assessed, combined, communicated, and used in decision-making using effective methods when asking experts to make judgements, i.e., avoiding just asking an expert or a group of experts using a structured process for making decisions that incorporate the evidence and having effective processes for

learning from actions In each case the specific problem with decision making is described with a range of practical solutions Adopting this approach to decision making requires societal change so detailed suggestions are made for transforming organisations governments businesses funders and philanthropists The practical suggestions include twelve downloadable checklists The vision of the authors is to transform conservation so it is more effective more cost efficient learns from practice and is more attractive to funders However the lessons of this important book go well beyond conservation to decision makers in any field **AACR 2019 Proceedings: Abstracts 2749-5314** American Association for Cancer Research,2019-03-08 American Association for Cancer Research 2019 Proceedings Abstracts 2749 5314 Part B Ovarian Cancer Immunotherapy Samir A.
