about a cyber war The book presents alternative views concerning whether the laws of war should apply or whether transnational criminal law or some other peacetime framework is more appropriate or if there is a tipping point that enables the laws of war to be used Secondly it examines the key principles of jus in bello to determine how they might be applied to cyber conflicts in particular those of proportionality and necessity It also investigates the distinction between civilian and combatant in this context and studies the level of causation necessary to elicit a response looking at the notion of a proximate cause Finally it analyses the specific operational realities implicated by particular regulatory regimes This book is unmissable reading for anyone interested in the impact of cyber warfare on international law and the laws of war
