Accounting 8th Edition Hoggett Medlin Edwards:

Sport Funding and Finance Bob Stewart, 2017-07-31 Sport Funding and Finance provides a complete introduction to the macro level and micro level aspects of sport finance. It describes the evolution of sport from a kitchen table operation into the sophisticated boardroom driven global financial industry that it is today. It uses the professional sports leagues of the US and Europe as an international benchmark and explains why the financial context is so important for all managers working in sport. The book also provides a step by step introduction to the principles and practice of effective financial management providing the reader with a complete set of professional tools and skills for use in the sport industry. Now in a fully revised and updated new edition the book develops the reader's understanding by first explaining basic concepts in finance and accounting before progressing to more complex issues and ideas. It covers every key topic in financial management including Planning and strategy, Budgeting, Financial projections, Fundraising, Pricing, Costing, Feasibility studies, Economic impact analysis, Ratio analysis. Every chapter includes a blend of theory, contextual material and real world data and case studies from around the world, clearly linking principles to practice as well as review questions and problem solving exercises to test the reader's understanding. Sport Funding and Finance is the perfect foundation text for any degree level course in sport finance and an invaluable reference for any sport management professional looking to deepen their understanding of funding and finance.

Accounting Education Seedwell Tanaka, Muyako Sithole, Indra Abeysekera, 2017-02-24 This book provides a comprehensive and critical overview of learning accounting. It illustrates that when learners need to mentally integrate two or more distinct items of information, it places unnecessary demands on cognitive load. The book discusses the cognitive load theory which assumes that the task of mental integration increases the load on already limited working memory and it does so to such an extent that learning may be severely impeded. The book also investigates how students could deal with cognitive overload when learning introductory accounting using three instructional design formats: the split attention format, the integrated format and the self managed format.

The Economics of Corporate Trade Credit in Europe Julia Koralun-Bereźnicka, Dawid Szramowski, 2021-12-30 This book is a research monograph addressed to a wide range of academics interested in corporate short term capital. The study shows the role of trade credit in the functioning of economic entities. It constitutes a comprehensive source of knowledge about the role of trade credit in the development of enterprises as well as the impact of this form of finance on the development of economies. Apart from an extensive review of the theoretical aspects of the role of trade credit in the economy, the study discusses the importance of factors influencing trade credit behaviour. Trade credit, despite its versatility, has not yet been fully described, particularly with regard to the specificity of domestic markets. This study aggregates and supplements the existing sources. The monograph is of an international character as it covers a substantial group of European countries. Therefore, it is likely to have international appeal. The findings may be of interest to those involved in finance management. Understanding the differences in receivables

management resulting from the country specificity can contribute to a better understanding of business finance and its operational functions This knowledge may support the effective management of receivables and liabilities especially in companies operating on the global market Chapters 1 and 5 of this book are freely available as a downloadable Open Access PDF under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license available at <http://www.taylorfrancis.com>
