

ASSETS

Assets are resources owned by a business that have economic value. They are the result of investments made by the business or its owners. Assets are recorded on the balance sheet and are classified into current assets and non-current assets.

- **Current Assets:** These are assets that are expected to be converted into cash or sold within the next 12 months. Examples include cash, accounts receivable, inventory, and prepaid expenses.
- **Non-current Assets:** These are assets that are not expected to be converted into cash or sold within the next 12 months. Examples include property, plant, and equipment, and intangible assets like patents and trademarks.

Assets are measured at their fair value, which is the price that would be received from the sale of an asset in an orderly transaction between market participants at the measurement date.

LIABILITIES

Liabilities are obligations or debts that a business owes to other parties. They are the result of borrowing money or credit from others. Liabilities are recorded on the balance sheet and are classified into current liabilities and non-current liabilities.

- **Current Liabilities:** These are liabilities that are expected to be settled within the next 12 months. Examples include accounts payable, short-term debt, and accrued liabilities.
- **Non-current Liabilities:** These are liabilities that are not expected to be settled within the next 12 months. Examples include long-term debt and deferred tax liabilities.

Liabilities are measured at their fair value, which is the price that would be received from the sale of a liability in an orderly transaction between market participants at the measurement date.

CONTRIBUTED CAPITAL

+ RETAINED EARNINGS

CONTRIBUTED CAPITAL

Contributed Capital represents the amount of capital that has been contributed by the owners of the business. It is a component of equity and is recorded on the balance sheet. Contributed capital is divided into common stock and preferred stock.

- **Common Stock:** This represents the ownership interest in the business. It is divided into shares, and each share represents a portion of the ownership.
- **Preferred Stock:** This represents a type of equity that has certain rights and privileges, such as the right to receive dividends before common stock.

ACCUMULATED PROFITS

- DIVIDENDS OR DRAWINGS

RETAINED EARNINGS

Retained Earnings represent the portion of a company's profits that are retained within the company rather than being distributed to shareholders as dividends. Retained earnings are a component of equity and are recorded on the balance sheet. Retained earnings are calculated as follows:

$$\text{Retained Earnings} = \text{Accumulated Profits} - \text{Dividends or Drawings}$$

EQUITY

Equity represents the ownership interest in a business. It is the residual interest in the assets of the business after deducting liabilities. Equity is recorded on the balance sheet and is divided into contributed capital and retained earnings.

- **Contributed Capital:** This represents the amount of capital that has been contributed by the owners of the business.
- **Retained Earnings:** This represents the portion of a company's profits that are retained within the company rather than being distributed to shareholders as dividends.
