Accounting History from the Renaissance to the Present T. A. Lee,A. Bishop,R. H. Parker,2014-06-23 First published in 1996 This book summarises the Seminar held in Edinburgh in 1994 in the five hundredth year since the publication of Luca Pacioli s *Summa de Arithmetica Geometria Proportioni et Proportionalita* Its purpose is simple but relevant to every accountant It revisits some fundamentals that lay behind Pacioli s decision to write his *Summa* and examines whether the accounting framework in which we work

today has overlooked basic issues because of its continued focus on development of the existing financial accounting model. It analyses Pacioli's legacy from several different perspectives deliberately choosing to do so in ways that addressed considerations that his work reflected: examining the nature and characteristics of the bridge between academic analysis and insight on the one hand and practical application on the other. It also looks at the dominant influences in the evolution of accountancy for managing stewardship and for reporting of that stewardship. By doing so it attempts to identify influences that had been less pressing and so had been ignored or overlooked and also considers how changing technology has affected the way we manage the accountancy process.

Accounting for Sustainability Gunnar Rimmel, 2025-09-03

This book provides a broad overview of how sustainability reporting has grown, how it is used now and where it is heading. Daily we encounter concepts such as corporate social responsibility (CSR), sustainability reporting, sustainability accounting, environmental reports, corporate citizenship or environmental management systems or Environmental Social and Governance (ESG) disclosures. *Accounting for Sustainability* decodes this terminology by offering an accessible introduction that explores sustainability reporting from both internal and external perspectives. It begins with an overview of key terms and theories followed by chapters on financial management, sustainability standards, accounting communication and capital markets. This new edition has been fully revised and expanded with four new chapters including coverage of the EU's Corporate Sustainability Reporting Directive (CSRD), European Sustainability Reporting Standards (ESRS) and the global efforts of the International Sustainability Standards Board (ISSB). It also includes critical reflections on digitalisation, standard setting and assurance. With learning outcomes and study questions embedded in each chapter, this book will be of great interest to students of sustainability reporting and accounting as well as practitioners taking related professional accreditations.
