Emoji Speak Jieun Kiaer, 2023-05-18 Providing an in depth discussion of emoji use in a global context this volume presents the use of emoji as a hugely important facet of computer mediated communication leading author Jieun Kiaer to coin the term emoji speak Exploring why and how emojis are born and the different ways in which people use them this book highlights the diversity of emoji speak Presenting the results of empirical investigations with participants of British Belgian Chinese French Japanese Jordanian Korean Singaporean and Spanish backgrounds it raises important questions around the complexity of emoji use Though emojis have become ubiquitous their interpretation can be more challenging What is humorous in one region for example might be considered inappropriate or insulting in another Whilst emoji use can speed up our communication we might also question whether they convey our emotions sufficiently Moreover far from belonging to the youth people of all ages now use emoji speak prompting Kiaer to consider the future of our communication in an increasingly digital world

Cinema in the Arab World Ifdal Elsaket, Daniël Biltereyst, Philippe Meers, 2023-01-26 Cinema in the Arab world has been the subject of varied and rigorous studies but most have focused on films as text providing in depth analyses of plot style ideologies or examination of the biographies of prominent directors or actors This innovative new volume shifts the focus on Arab cinema off screen to examine the histories politics and conditions of distribution exhibition and cinema going in the Arab world Through broadening the frame of study beyond the screen the book widens understanding of the cinema not merely as a collection of films as texts but as a site of cultural and political contestation in the Arab world Divided into two sections and guided by interdisciplinary considerations the contributors examine historical and contemporary issues of Arab cinema in terms of the experience of movie going and filmmaking They examine the networks of distribution and exhibition as well as the contested and multiple meanings that the cinema embodied through diverse historical periods and geographical locations Part I focuses

on new histories of Arab cinema in terms of film production distribution exhibition and audience s experiences of cinema going Part II deals with more recent issues within scholarship on Arab cinema such as issues of politics economics ideologies as well as issues related to Arab movies international circulation and screenings at festivals Together the chapters enrich our understanding of the cinema in the Arab world showing how deeply embedded it is within its social political and economic contexts Emoji Pragmatics Francisco Yus,2025-05-24

Emoji is everywhere on messaging apps social networking sites and even in offline media like billboards films and printed ads While there is a substantial existing bibliography on emojis it often fails to address their functions and interpretations in purely pragmatic terms specifically focusing on their impact on inferential strategies for both the emojis themselves and accompanying texts Existing books on this topic tend to focus on the semiotic aspects or visual impact of emojis rather than their crucial role in interpreting the messaging text or social media post to which they are attached as well as the way they communicate their own meanings when used in isolation so called naked emojis This book is original in analysing the pragmatic roles that emojis play in online communication the additional information they convey and the role of context in their successful interpretation The book also argues that despite the apparent differences between words and images emojis perform similar functions and are inferred in similar ways to words with the aid of context Additionally the book dedicates several chapters to demographic variables age gender ethnic origin personality etc the role of interface affordances in emoji use and thematic areas where emojis are frequently found humour advertising marketing politics law and health *Expressive Emojis: Adding Playful Expressions with HTML, CSS & JS*

Language, Corpora, and Technology in Applied Linguistics

Muhammad Afzaal, Swaleha Bano Naqvi, Geng Qiang, 2023-11-27 As culture and society has become more digitalized especially when computer science and digital technologies have entered a new era in the twenty first century translation studies began to utilize a wide range of tools to enhance its reading of texts and contexts without which translation both as a practice and as a theorization could barely persist It has become more apparent that two extreme poles between macro and micro visions have formed the diversified terrains of translation studies On the one hand technologies like NLP topic modeling network analysis and data visualization make distant reading become possible thus allowing us to have a paradigmatic view of how human s ideas beliefs values knowledge and even emotions have spread in some patterns across cultural geographical and language divides in world history On the other hand corpus methods such as the use of keywords collocates and concordance lines changed the way by which texts were closely read from linear to vertical With microscope like corpus tools we could go deeper into the texture for perception of nuanced meaning While considering a fact that translation is seldom mono modal in conveying meaning we have to reconceptualize context as a multimodal environment where audio visual and other resources interact to convey and make meaning With regard to the fast development of digital technology translation studies take an active role in gaining an enhanced capability in promoting transformation Complexity has been favored in terms of theoretical framework and methodology New questions are asked old ones revisited with novel tools but more areas wait to be cultivated and more questions to be approached by combining quantitative and qualitative methods We could ask if digital technologies would bring new innovation to study of translation history a heavily walled land for traditional humanists who tend to repeat so what to question the less significance of data driven studies The idea of high quality machine translation has become so realistic in today s market that translation educators have to face the shock wave

it brought to translation learners and practitioners and rethink the relation between human translators and algorithms Machine translation assisted communication could help remove boundaries for better communication but at the same time it also creates conflicts and leads to confrontation Thus understood it is imperative to give a concerned attention to digital translation studies that is to study translation by resorting to and drawing on the digital technologies This Research Topic is intended to promote current directions and new developments in cross disciplinary critical discourse research We welcome papers which from a critical analytical perspective deal with contemporary social scientific political economic or professional discourses and genres Papers addressing the highlighted topics are especially welcome In giving weight to these topics we wish to call to attention some of the most pressing problems currently facing the world
