Architecture In Communion Implementing The Second Vatican Council Through Liturgy And Architecture:

Architecture in Communion Steven J. Schloeder, 1998 Amid the growing dissatisfaction with Catholic church architecture since the Second Vatican Council and the general lack of clear and vibrant direction in liturgy this book responds to the timely question of How ought we build our churches Drawing upon the texts of the Second Vatican Council recent papal encyclicals and the Catechism of the Catholic Church Schloeder examines this question in depth with regard to history theology iconography and symbolism Schloeder seeks not merely to analyze why modern churches are so uninspiring but he offers positive direction for the renewal of an authentic Catholic architecture one that respects the traditions of the Church s magnificent artistic heritage while advancing the vision of the Second Vatican Council The key to the solution is to regain a sacramental vision of the liturgy and of architecture a vision that will help us to build churches that nurture the human spirit with beauty and meaning

Lost in Wonder Aidan Nichols, 2011 This book explores the liturgy as the manifestation by cultic signs of Christian revelation the setting of the Liturgy in terms of architectural space iconography and music and the poetic response which the revelation the liturgy carries can produce Nichols makes the case for Christianity s capacity to inspire high culture both in principle and through well chosen historical examples which draw on the best in Catholicism Eastern Orthodoxy and Anglicanism

Lost in Wonder Aidan Nichols O. P., 2016-04-22 This book explores the Liturgy as the manifestation by cultic signs of Christian revelation the setting of the Liturgy in terms of architectural space iconography and music and the poetic response which the revelation the Liturgy carries can produce The conclusion offers a synthetic statement of the unity of religion cosmology and art Aidan Nichols makes the case for Christianity s capacity to inspire high culture both in principle and through well chosen historical examples which draw on the best in Catholicism Eastern Orthodoxy and Anglicanism

Sacred Space for the Missional Church William R. McAlpine, 2011-02-14 Sacred Space for the Missional Church examines the strong link between the theology and mission of the Church and the spaces in which and from which that theology and mission are lived out The author demonstrates that the built environment is not incidental or even subservient to mission Rather it is a key player in the fulfillment and the communication of that mission The book begins with a working definition of the missional church underscoring the connection between God s mission missio Dei and the Church s mission The reader is presented with historical and theological frameworks for sacred space and reminded of the pivotal role of the built environment in the fulfillment of the mission of the Church The design and construction of sacred spaces are shown to be fundamentally a theological exercise and not solely a matter of function pragmatics and fiscal astuteness The author questions the uncritical application of blanket statements such form must follow function and challenges the conviction that it does not matter where

worship occurs only that it occurs The book addresses genuine concerns such as legitimizing the cost of church buildings and concludes with practical suggestions and essential questions that must be considered in posturing the built environment within the missional praxis of the Church *Architectural Actions on the Religious Heritage after Vatican II* Esteban Fernández-Cobián,2020-11-09 This book serves to shed some light on several controversial questions about contemporary interventions on religious heritage buildings In the mid 1960s a process of renewal of Catholic churches began which sought to respond to the liturgical modifications implemented during the Vatican II 1962 65 Fifty years later this process continues to be problematic in buildings with a high heritage or historical value From an operational point of view it is stimulating to revisit the most relevant architectures at the international level those high impact works that were generated thanks to an open and serene dialogue between principals architects users artists and patrimonial leaders Thus it is essential to know the criteria that have supported interventions whether legal both ecclesiastical and civil architectural artistic liturgical or pastoral In this sense what references could be used at a time like ours How can we reform what has already been reformed

Sanctioning Modernism Vladimir Kulic,Timothy Parker,Monica Penick,2014-06-01 In the decades following World War II modern architecture spread around the globe alongside increased modernization urbanization and postwar reconstruction and it eventually won widespread acceptance But as the limitations of conventional conceptions of modernism became apparent modern architecture has come under increasing criticism In this collection of essays experienced and emerging scholars take a fresh look at postwar modern architecture by asking what it meant to be modern what role modern architecture played in constructing modern identities and who sanctioned or was sanctioned by modernism in architecture This volume presents focused case studies of modern architecture in three realms political religious and domestic that address our very essence as human beings Several essays explore developments in Czechoslovakia Romania and Yugoslavia and document a modernist design culture that crossed political barriers such as the Iron Curtain more readily than previously imagined Other essays investigate various efforts to reconcile the concerns of modernist architects with the traditions of the Roman Catholic Church and other Christian institutions And a final group of essays looks at postwar homebuilding in the United States and demonstrates how malleable and contested the image of the American home was in the mid twentieth century These inquiries show the limits of canonical views of modern architecture and reveal instead how civic institutions ecclesiastical traditions individual consumers and others sought to sanction the forms and ideas of modern architecture in the service of their respective claims or desires to be modern **The Meaning of Christian Liturgy** Oloph Bexell,2012-08-17 The Church of Sweden is the largest Lutheran church body in the world with 6 5 million members that represent about 70% of the Swedish population The Meaning of Christian Liturgy illuminates and explains the changes that have occurred in the liturgy of the Church of Sweden from 1980 to 2000 In the process this volume asks a number of questions of immense importance not only within Sweden but also for Christian churches in the English speaking world

including How does participation in a liturgy make clear what church is about What does liturgical participation say about who or what God is and about the community's encounter with God How have churches lived with the changes and renewals introduced in the twentieth century How does the church building shape worshipers' ideas of God and of church Contributors Torbjørn Axner Oloph Bexell Sven Erik Brodd Gordon W Lathrop Karin Oljelund Boel Hssjer Sundman Gunnar Weman

Building the Modern Church Robert Proctor, 2016-05-23 Fifty years after the Second Vatican Council architectural historian Robert Proctor examines the transformations in British Roman Catholic church architecture that took place in the two decades surrounding this crucial event Inspired by new thinking in theology and changing practices of worship and by a growing acceptance of modern art and architecture architects designed radical new forms of church building in a campaign of new buildings for new urban contexts A focussed study of mid twentieth century church architecture Building the Modern Church considers how architects and clergy constructed the image and reality of the Church as an institution through its buildings The author examines changing conceptions of tradition and modernity and the development of a modern church architecture that drew from the ideas of the liturgical movement The role of Catholic clergy as patrons of modern architecture and art and the changing attitudes of the Church and its architects to modernity are examined explaining how different strands of post war architecture were adopted in the field of ecclesiastical buildings The church building's social role in defining communities through rituals and symbols is also considered together with the relationships between churches and modernist urban planning in new towns and suburbs Case studies analysed in detail include significant buildings and architects that have remained little known until now Based on meticulous historical research in primary sources theoretically informed fully referenced and thoroughly illustrated this book will be of interest to anyone concerned with the church architecture art and theology of this period

Theology in Stone Richard Kieckhefer, 2008-07-24 Thinking about church architecture has come to an impasse Reformers and traditionalists are talking past each other Statements from both sides are often strident and dogmatic In Theology in Stone Richard Kieckhefer seeks to help both sides move beyond the standoff toward a fruitful conversation about houses of worship Drawing on a wide range of historical examples with an eye to their contemporary relevance he offers new ideas about the meanings and uses of church architecture
