Architecture From Prehistory To Postmodernity Reprint 2nd Edition:

Architecture, from Prehistory to Postmodernity Marvin Trachtenberg, Isabelle Hyman, 2002 Moving back and forth between the long shot on historical trends and close ups on major works and crucial architectural themes this insightful lively and original analysis also accepts the conventional period and thematic structures of architectural history and the canon of great buildings Designed to help readers understand and appreciate what great architecture is in its full dimensions of use structure and aesthetic qualities as well as its history this lavishly illustrated book explains specific qualities of each period and the often complex illuminating differences between the periods This comprehensive volume examines all aspects of architectural history from the Ancient world the Middle Ages the Renaissance and Baroque periods through the modern world For historians and architectural enthusiasts Subject Guide to Books in Print, 1997 Sacred Power, Sacred Space Jeanne Halgren Kilde, 2008-07-21 Jeanne Halgren Kilde's survey of church architecture is unlike any other Her main concern is not the buildings themselves but rather the dynamic character of Christianity and how church buildings shape and influence the religion Kilde argues that a primary function of church buildings is to represent and reify three different types of power divine power or ideas about God personal empowerment as manifested in the individual's perceived relationship to the divine and social power meaning the relationships between groups such as clergy and laity Each type intersects with notions of Christian creed cult and code and is represented spatially and materially in church buildings Kilde explores these categories chronologically from the early church to the twentieth century She considers the form organization and use of worship rooms the location of churches and the interaction between churches and the wider culture Church buildings have been integral to Christianity and Kilde's important study sheds new light on the way they impact all aspects of the religion Neither mere witnesses to transformations of religious thought or nor simple backgrounds for religious practice church buildings are in Kilde's view dynamic participants in religious change and goldmines of information on Christianity itself
