Rodwell, Peggy Baty, 1995 **Practical Applications in Business Aviation Management** James R. Cannon, Franklin D. Richey, 2012-01-16 Business aviation is one of America's most important yet least understood industries Most organizations about 85% operating business aircraft are small and medium size enterprises They include a wide range of organizations state governments universities charitable organizations and all types of businesses While the organizations that rely on business aviation are varied they all have one thing in common the need for fast flexible safe and secure access to destinations worldwide Many small U S businesses rely on business aviation They are located in markets where the airlines have reduced or eliminated service making business aviation an important connection to the rest of the world Business aviation fosters efficiency and productivity and is essential in an intensely competitive global marketplace This

textbook Practical Applications in Business Aviation Management systematically examines business aviation and provides you with a complete understanding of one of America's most dynamic industries. In this comprehensive guide to business aviation management, authors James R. Cannon and Franklin D. Richey provide in-depth and useful information on all aspects of managing a corporate aviation program. The book begins with a brief look at the history of business aviation and its important role in the aviation industry. It then moves on to focus on the practical issues facing all corporate aviation programs, such as Regulatory compliance, Administrative issues, Aircraft and facility maintenance, Finances and budgeting, Aircraft selection and acquisition, Standard operating procedures, International operations, Human resource management, Training, Communication and teambuilding, Safety and security, and much more. The book also includes a foreword by Ed Bolen, the President and CEO of the National Business Aviation Association. It is an essential tool for students and professionals who need comprehensive, accurate, and practical information on managing a corporate aviation program.

US Forest Service Fire and Aviation Management: Aviation Safety Management System Guide Department Agriculture, Forest Service, 2012-11-06

A Safety Management System (SMS) is essentially a quality management approach to controlling risk. It provides the organizational framework to construct and support a sound safety culture that actively controls its risk exposure. With increased aviation activity and decreased resources, the SMS pushes the limits of current safety strategies and practices by developing and implementing a structured management system to control risk and meet legal responsibilities in aviation operations. Our goal is to develop a safety culture that achieves and maintains a zero accident rate. A highly successful safety culture understands that every person in the organization accepts that safety is a conscious and ongoing mindset, as opposed to simply a box to be checked. We understand that safety is a dynamic, non-event. Consequently, we need to maintain the capability to continuously seek out and eliminate latent defects within our systems and culture. By being proactive in this area, we eliminate potential causal factors that could lead to future accidents. The purpose of this guide is to assist in fulfilling the requirements of FSM 5700 and the National Aviation Safety and Management Plan with respect to the implementation of Safety Management Systems (SMS). This guide provides best practices for the application of SMS in the Forest Service and for its service providers. The SMS shall comprehensively examine the functions of the Forest Service and the operational environment to identify hazards and to analyze associated risks. The specific functional components include Safety management Organization and personnel Training and proficiency, Flight operations, International operations when applicable, Aircraft equipment requirements, Aircraft maintenance, Operations policies and procedures, Emergency accident incident response, Environmental management, Occupational health and safety, and Security. This document provides guidance for SMS development applicable to all Forest Service aviation operations. Statements containing the words "must," "shall," and "will" are directive in nature, and the corresponding policy can be found in the FSM 5700. This Guide contains best practices for Safety Management Systems in the aviation program; thus, the terms "may" and "should" indicate the best practice or an industry standard that allows some
