in Counselling and Psychotherapy: A Practical Guide David Lane,Sarah Corrie,2012-05-16 It is commonly assumed that the ability to make decisions in therapy is acquired as a result of experience and for this reason the subject is more or less ignored in programmes of training Lane and Corrie effectively challenge this position in a comprehensive account of the process by which information is acquired interpreted and used The book benefits from the comprehensive experience of the two authors both as clinicians and researchers and is illustrated by some excellent case material and interesting self assessment exercises There is something of value here for therapists of every modality at all stages of development Ray Woolfe Psychologist and Psychotherapist in independent practice Bristol UK In this well written meticulously researched and timely book Lane and Corrie propose that the art of decision making like any art requires discipline training and continual practice This book should be required reading on clinical and counselling psychology programmes and related fields For those about to enter practice this book provides you with much needed support for engaging with the realities of a complex and shifting political and professional landscape For the more experienced practitioner this book challenges you to become more explicit about and to sharpen and widen the assumptions models and procedures that guide your everyday decision making This is continuing professional development of the most relevant and needed kind I will be recommending this text to my students colleagues peers and yes managers very strongly indeed Dr Michael Worrell Consultant Clinical Psychologist Programme Director CNWL Foundation Trust In this book Lane and Corrie have made an important contribution to the training of counsellors and therapists and the practice of working in the helping professions and they have managed to do this in a way that is engaging accessible and practical Whether you are just starting out in the helping professions or are a seasoned therapist this book will help you improve your practice The case studies illustrations and reflection questions bring to life the dynamics of decision making and provide the reader with useful pathways to more sophisticated and effective decision making in their work Dr Michael Cavanagh Coaching Psychology Unit Sydney University Australia and Visiting Professor Institute of Work Based Learning Middlesex University UK Lane and Corrie draw upon their rich experience and understanding not just as clinicians and researchers but also as adult educators to provide a book which deepens our understanding of decision making The insights and approach put forward go beyond the professional context which illustrates them to contribute to a broader understanding of what it is or what it might be to be a professional and to take professional decisions in an increasingly complex and rapidly changing world When considering how good decision makers develop the key insight is to focus our attention upon the learning process rather than knowledge content This change of viewpoint is profound Professor Jonathan Garnett Director Institute for Work Based Learning Middlesex University UK The book is organised well and an appealing aspect of this book is Lane and Corrie s ability to combine their clinical expertise with their research and training experience to engage the reader on their own self reflective journey through the use of practical exercises I would whole heartedly recommend this book to all clinicians whether to use as guidance when initially

thinking about their decision making skills or as part of continuing professional development Rita Woo Clinical Psychologist CNWL Foundation NHS Trust Royal Holloway University of London UK Working with a client in order to bring about therapeutic change involves a constant stream of decisions But how exactly do you decide What influences your choices and how can you be sure that you are making the right ones This book examines some of the factors that are involved in making good decisions the range of thinking skills we need in order to make effective choices and some of the factors that can prevent us from making sound decisions in our work with clients Drawing on both the existing literature and a range of practical exercises Making Successful Decisions in Counselling and Psychotherapy provides invaluable guidance on how to tackle the task of decision making in real world counselling and psychotherapeutic settings in order to develop a systematic effective and creative approach The book includes A model to generate approaches to decision making Case studies across a wide range of situations in counselling and psychotherapy Reflection points throughout the text to assist you in critiquing refining and restructuring the tools you use to assist your clients to make successful decisions The Sage Handbook of Decision Making, Assessment and Risk in Social Work Brian J.
