The ARC Navomatic 300A Autopilot

Please note its operation highlighted in “blue” below:

The ARC 300A was an option on many single engine Cessna aircraft available near the mid-seventies and stayed on the option list up through the T210L. Cessna 172M, 180J, 182P, TU-206F, these are but a few aircraft that had the 300A on their option list. I've been told the 300A was available for the twin-engine 337 Skymaster but I've never seen one installed in a twin.

The reason I'm writing this article is because for some reason I've received a lot of tech calls about this product, even though this autopilot has been out of production for well over a score. Maybe this writing will answer some of your questions as to the theory behind the 300A and what it takes to fix it.

The ARC 300A autopilot is what we call a “single axis”
