Dodsworth, 2018-09-22 The interdisciplinary uses of traditional cartographic resources and modern GIS tools allow for the
analysis and discovery of information across a wide spectrum of fields A Research Guide to Cartographic Resources navigates
the numerous American and Canadian cartographic resources available in print and online offering researchers academics
and students with information on how to locate and access the large variety of resources new and old Dozens of different
cartographic materials are highlighted and summarized along with lists of map libraries and geospatial centers and related
professional associations A Research Guide to Cartographic Resources consists of 18 chapters two appendices and a detailed
index that includes place names and libraries structured in a manner consistent with most reference guides including
cartographic categories such as atlases dictionaries gazetteers handbooks maps plans GIS data and other related material
Almost all of the resources listed in this guide are categorized by geography down to the county level making efficient work
of the type of material required to meet the information needs of those interested in researching place specific cartographic
related resources Additionally this guide will help those interested in not only developing a comprehensive collection in these
subject areas but get an understanding of what materials are being collected and housed in specific map libraries geospatial
centers and their related websites Of particular value are the sections that offer directories of cartographic and GIS libraries
as well as comprehensive lists of geospatial datasets down to the county level This volume combines the traditional and
historical collections of cartography with the modern applications of GIS based maps and geospatial datasets
