Architecture And Its Ethical Dilemmas:

Architecture and its Ethical Dilemmas Nicholas Ray, 2007-05-07 A cast of leading writers and practitioners tackle the ethical questions that architects are increasingly facing in their work from practical considerations in construction to the wider social context of buildings their appearance use and place in the narrative of the environment This book gives an account of these ethical questions from the perspectives of historical architectural practice philosophy and business and examines the implications of such dilemmas Taking the current discussion of ethics in architecture on to a new stage this volume provides an accumulation of diverse opinions focusing on architects actions and products that materially affect the lives of people in all urbanized societies

Ethics and the Practice of Architecture Barry Wasserman, Patrick J. Sullivan, Gregory Palermo, 2000-03-07 From theory to practice a unique well rounded guide to ethics for today's architect How does an architect assist a community in evaluating alternative designs Resolve a dispute with a contractor Take into account a project's impact on the natural environment When it comes to questions like these making decisions about what ought to be done or what is the best or right solution requires more than sound technical knowledge and strong design talent It demands a solid understanding of the ethical issues that lie at the heart of architectural practice Ethics and the Practice of Architecture offers a complete broad based introduction to this crucial subject First it examines basic ethical theories and their application to architecture and discusses different ways of identifying ethical content in architecture Bridging the gap between theory and practice the second part of the book surveys different professional settings and building project processes that frequently hold ethical concerns and charts the ethical mandates that arise from them In the final section of the book thirty case studies explore a wide range of ethical dilemmas encountered in architectural practice with useful guidance on how to work through them effectively Arranged by topics that span the key phases of a project from pre design through post occupancy evaluation these case studies allow a detailed look at ethical concerns in real life situations where multiple issues are often at stake Providing a practical framework for the exploration of ethical issues in architecture today Ethics and the Practice of Architecture is an excellent resource for present and future architects in all areas of the field

The Ethical Architect Tom Spector, 2001-06 In this book Tom Spector addresses the dilemmas of architectural practice and offers a theoretical and practical basis for an examination and transformation of the quandaries the profession now faces The Ethical Architect is a work of theory but refers to real buildings and real world problems Its conclusions provide a road map for architects to address the more than 100 000 decisions that go into the design of an average sized building

Ethics for Architects Thomas Fisher, 2010-10-27 In this book the author presents fifty case studies representing a broad range of ethical dilemmas facing today's architects from questions regarding which clients to work for to the moral imperatives of reclaiming building materials for construction instead of sending them to landfills

Architecture, Ethics, and the Personhood of Place Gregory Caicco, 2007 Architecture and environmental design are among the last professional fields to develop a sustained

and nuanced discussion concerning ethics Hemmed in by politics and powerful clients on one side and the often unscrupulous practices of the construction industry on the other environmental designers have been traditionally reluctant to address ethical issues head on And yet the rapid urbanization of the world s population continues to swell into new megacities each less healthy welcoming secure or environmentally sustainable than the next Green carbon reduced and sustainable building practices are important ways architects have recently responded to the symptoms of the crisis but are these efforts really addressing the core issues Taking the Dine Navajo Hogan Song a song used to protect and nourish the personhood of newly constructed dwellings as their inspiration the architects philosophers poets and other contemporary scholars contributing to this volume demonstrate that a deeper more radical change in our relationship to the built world needs to occur While offering a careful critique of modernist corporate or techno enthralled design practices these essays investigate an alternative relational ecology whose wisdom draws from ancient and often marginalized voices if not the whisperings of the earth itself Contributors include Richard Kearney Alberto Perez Gomez Juhani Pallasmaa Karsten Harries Edward Casey Susan Stewart David Abram Stacy Alaimo Jace and Laura Weaver Philip Sheldrake and Sebnem Yucel Young
