Metaphoric Architecture Michael C. Abrams, 2025-07-14 *Metaphoric Architecture* focuses on a fundamental but often challenging part of the beginning design phases how to take an abstract idea and transform it into a three dimensional object space or building Through media experimentation analysis of innovative case studies and hands on exercises Abrams guides the reader through the early stages of design which include site and precedent analysis among other initial approaches To comprehend design thinking the visual arts music and film are examined in relation to

architecture Chapters demonstrate how abstract ideas inspired by paintings music and films can be utilized in the spatial design process and transformed into habitable spaces There are 22 exercises that increase in complexity to strengthen students abilities and promote the use of digital and manual representation in a back and forth motion With 444 illustrations this book demystifies the process of designing 3D form and space in a highly visual way It will be the ideal studio companion for beginning and intermediate students of both architecture and interior design with a wide range of architectural lessons that include abstraction design fundamentals concept development building design case study analysis and site to building relationships

Spatial Cognition IV, Reasoning, Action, Interaction Christian Freksa, Markus Knauff, Bernd Krieg-Brückner, Bernhard Nebel, Thomas Barkowsky, 2005-02-22 This is the fourth volume in a series of books dedicated to basic research in spatial cognition Spatial cognition is a field that investigates the connection between the physical spatial world and the mental world Philosophers and researchers have posed various views concerning the relation between the physical and the mental worlds Plato considered pure concepts of thought as separate from their physical manifestations while Aristotle considered the physical and the mental realms as two aspects of the same substance Descartes a dualist discussed the interaction between body and soul through an interface organ and thus introduced a functional view that presented a challenge for the natural sciences and the humanities In modern psychology the relation between the physical and the cognitive space has been investigated using thorough experiments and in artificial intelligence we have seen views as diverse as problems can be solved on a representation of the world and a representation of the world is not necessary Today's spatial cognition work establishes a correspondence between the mental and the physical worlds by studying and exploiting their interaction it investigates how mental space and spatial reality join together in understanding the world and in interacting with it The physical and representational aspects are equally important in this work Almost all topics of cognitive science manifest themselves in spatial cognition
