Bletchley Park Code Breaking Shire Library:

Women in Allied Naval Intelligence in the Second World War Sarah-Louise Miller, 2024-10-17 Closely examining the work of women in the US and British naval services towards Allied naval intelligence during the Second World War this book focuses on their contributions during the Battle of the Atlantic and Pacific Naval War in order to shed new light on arenas of war from which women's narratives are almost always absent Including personal testimonies from those involved and surveying a wide cross section of different roles Sarah Louise Miller analyses the work of women at every level and rank in the US and British naval services and offers a much wider picture of how they assisted the Allied forces behind closed doors With exploration of the work of the WRNS and WAVES on developing naval intelligence this book argues that they played a crucial role in the British and American SIGINT systems and within programs such as those at Bletchley Park and OP 20 G therefore directly impacting the organisation and outcome of Anglo American naval efforts Including analysis of the development of the modern kill chain Miller also re evaluates the effect of the combat taboo to demonstrate that the WRNS and WAVES were in fact at the cutting edge of the emergence of modern warfare

WW2 Codebreaking People and Places Ronald Koorm, 2024-09-30 WW2 Codebreaking People and Places is the first volume of a series on a glossary of codebreaking People and Places brings to the reader an easily understandable account and listing of those involved in collecting and analysing military intelligence principally during the second world war while some will be well known such as Alan Turing many others have made significant contributions to codebreaking but fail to attract the attention of the media for the most part From an individual named Wren who worked at a codebreaking outstation supporting Bletchley Park to a mathematician who modified a codebreaking machine just prior to D Day to a ladies foundationwear factory in Hertfordshire that helped make machine components these people and places now can be appreciated as to where they fitted in within the overall picture of gathering and processing enemy intelligence in wartime The entries are cross referenced to enable the reader to research as much or as little as they want to dip in to the glossary to use it as a basis for further study or just to learn a little more about the people that helped us win the war with our allied friends
