Proceedings of the Second Symposium on Assessment of Quality Software Development Tools Ez Nahouraii,1992 **On the Role of Contrast in Information Structure** Jorina Brysbaert,Karen Lahousse,2024-06-04 In research on Information Structure there is an ongoing discussion about the role of contrast While most linguists consider contrast to be compatible with both focus and topic some argue that it is an autonomous IS category Contrast has been shown to be encoded by different linguistic means such as specific morphemes adverbials clefts prosodic cues Hence this concept is also related to other domains in particular morphosyntax and prosody The precise way in which they interact is however not yet entirely clear Moreover from a methodological point of view the identification and annotation of contrast in corpora is not straightforward This volume provides a selection of articles discussing the definition of contrast the importance of distinguishing different types of contrast the use of several encoding strategies and the annotation of contrast in corpora using the Question Under Discussion Model The contributions offer data on English French French Belgian Sign Language German Hindi Italian and Spanish **Catalog of Copyright Entries.
