Anonymous File Sharing & Darknet Lance Henderson,2023-09-27 Trust but Verify That has been the adage online as well as off but do you really know how to protect yourself against identity thieves government snoops and other misfits nosing into your online affairs Does the concept of encrypting your hard drive using Truecrypt Tor Freenet Drivecrypt and the like send your head spinning in confusion No longer This book makes it ridiculously simple to live a life free of the tracking mechanisms put in place by Google Facebook and Twitter along with a host of other sites that care nothing about your online privacy concerns In fact as far as they re concerned the less privacy you have the higher their profits at your expense Learn how to keep everyone even corrupt governments out of your computer even if it is confiscated Learn when to

engage the Fifth Amendment to protect YOUR rights from those that wish to turn your own words against you Discover why Facebook profits exponentially when you encourage your family and friends to sign up and tag photos Learn why anonymous systems like Tor and Freenet are the antithesis of privacy destroying corporate giants like Facebook Google LinkedIn Learn why Google Facebook other social media giants will lobby against anonymous networks in the coming years Darknet what is it and why it is a threat to Facebook Google and other ad networks who stand to lose millions in ad revenue as more and more people opt out You have absolutely nothing to lose and everything to gain by teaching yourself the basics Start now and sleep at night with peace of mind Excerpt Freenet Vulnerabilities Unlike most other P2P systems it actually matters what you say on Freenet boards Like Tor you can quite easily give away your geographical location if you are not careful Geographical spellings like colour and labour can reveal that you are either in the UK or Canada This is mostly a problem only in conjunction with other leaks of personal information such as a list of your favorite sports team or local restaurant Node Reference If you give anyone your node reference they can link your IP address with your nick and reveal your true identity You should only reveal this to sources that you trust 100% such as those on your friends list If you let slip your node reference on a message board in Frost it will be viewable by thousands of Freenet users across the globe and there is absolutely no deleting it from the boards There are no moderators or administrators on Freenet in the sense that they can remove inserts from the network Needless to say having this level of free speech has some drawbacks in that spammers and trolls like to target the network System Time Make certain that your system time in your BIOS for your motherboard is set correctly It can be used to correlate an attack and reveal your Freenet identity if it is not While this method might not stand up to jury scrutiny in the US it would certainly be disastrous for a Chinese or Iranian dissident wanting to keep his identity secret There are a multitude of places online where you can synchronize your system time The default tray icon in windows is insufficient in this regard Restart your pc then hit delete to see what timestamp your system is really relaying to the world

The United States of Anonymous Jeff Kosseff,2022-03-15 In The United States of Anonymous Jeff Kosseff explores how the right to anonymity has shaped American values politics business security and discourse particularly as technology has enabled people to separate their identities from their communications Legal and political debates surrounding online privacy often focus on the Fourth Amendment s protection against unreasonable searches and seizures overlooking the history and future of an equally powerful privacy right the First Amendment s protection of anonymity The United States of Anonymous features extensive and engaging interviews with people involved in the highest profile anonymity cases as well as with those who have benefited from and been harmed by anonymous communications Through these interviews Kosseff explores how courts have protected anonymity for decades and likewise how law and technology have allowed individuals to control how much if any identifying information is associated with their communications From blocking laws that prevent Ku Klux Klan members from wearing masks to restraining Alabama officials from forcing the NAACP to disclose its membership lists and to refusing companies requests to unmask online critics courts have recognized that anonymity is a vital part of our free speech protections The United States of Anonymous weighs the tradeoffs between the right to hide identity and the harms of anonymity concluding that we must maintain a strong if not absolute right to anonymous speech
