Ladies in the Laboratory II Mary R.S. Creese, Thomas M. Creese, 2004-05-17 The lives of many of the nineteenth century's most notable women of science are presented in English for the first time in this companion volume to *Ladies in the Laboratory*. American and British Women in Science. The present volume bridges a considerable gap in English literature available on women from twelve west European countries and their work in the biological and medical sciences, mathematics and social sciences. A fascinating analysis of the work of notable women by national group giving thorough data comparing the contributions of women in choice fields. Among the women presented are more than a few colorful personalities representative of the entire social scale from a royal princess to the daughter of a Paris slum shopkeeper.
