Uptegrove,2010-06-29 *Combinatorics and Reasoning Representing Justifying and Building Isomorphisms* is based on the
accomplishments of a cohort group of learners from first grade through high school and beyond concentrating on their work
on a set of combinatorics tasks By studying these students the editors gain insight into the foundations of proof building the
tools and environments necessary to make connections activities to extend and generalize combinatoric learning and even
explore implications of this learning on the undergraduate level This volume underscores the power of attending to basic
ideas in building arguments it shows the importance of providing opportunities for the co construction of knowledge by
groups of learners and it demonstrates the value of careful construction of appropriate tasks Moreover it documents how
reasoning that takes the form of proof evolves with young children and discusses the conditions for supporting student
reasoning
