a history of the partnership between Indonesia and the Asian Development Bank (ADB). When Indonesia became a founding member of the bank in 1966, the country faced daunting challenges. In the five decades that passed, both Indonesia and ADB have evolved in remarkable ways. Indonesia developed rapidly through the late 1990s yet faced a difficult time of adjustment after the Asian financial crisis of 1997-1998. The country has since resumed growth in the last decade. For its part, ADB has widened its activities in Indonesia, transforming from a project-oriented bank into a broad-based development institution. This effective partnership reflects Indonesia's success in working with the international community in the past 50 years.

Unplanned Development Jonathan Rigg, 2012-10-11 Unplanned Development offers a fascinating and fresh view into the realities of development planning. While

to the outsider most development projects present themselves as thoroughly planned endeavours informed by structure direction and intent Jonathan Rigg exposes the truth of development experience that chance serendipity turbulence and the unexpected define development around the world Based on rich empirical sources from South East Asia *Unplanned Development* sustains a unique general argument in making the case for chance and turbulence in development Identifying chance as a leading factor in all development planning the book contributes to a better way of dealing with the unexpected and asks vital questions on the underlying paradoxes of development practice *South Asian Economic Development* Moazzem Hossain, Rajat Kathuria, Iyanatul Islam, 2010 South Asia's developing nations have been enjoying moderate to high growth over the past decade before the global recession began This new edition provides an up to date guide to the growing markets in South Asia It offers an analysis of the changes and consequences of high sustainable growth investigating what has been achieved in the region during the last ten years from a macroeconomic viewpoint identifying new challenges and clearly defining what has driven the boom The first part of the textbook presents an analysis of how South Asia is rated against Southeast and East Asia in recent decades in economic and social terms The second part of the text focuses on South Asia's economic development over 1990s and mid 2000s and the third and final part identifies those major governance issues which were responsible for South Asia's underperformance both socially and economically It is widely recognised that globalisation enhanced global trade and that trade further increased the region's prosperity Embracing the view that economists can no longer regard themselves as technocratic guardians of neutral policy advice the book advocates for a shift in focus from policy reform per se to the more challenging task of implementing institutional reform that will invigorate the capability of the political leadership to bring about rapid sustained and poverty reducing growth in South Asia The central task would be to re-direct the focus of governments in South Asia in order to ensure that the core functions of the state stable non distortionary policy climate a secure foundation of law investment in basic education health and infrastructure protection of the vulnerable and adapting with the climate change are efficiently provided At the same time the reform agenda must be sensitive to the goal of ensuring that durable democratic institutions traditions and values are preserved This is a fundamental challenge but one that must be met in order to secure the emergence of a prosperous South Asia in the early part of the twenty first century This textbook will be useful for students and researchers in Development Economics Business Economics Development Studies and Asian Studies **Development Centre Seminars Financial Liberalisation in Asia Analysis and Prospects** OECD, Asian Development Bank, 1999-03-16 Rapid globalisation has brought substantial benefits to developing Asia but it has also heightened the risks associated with policy mistakes weak financial institutions and problems in corporate and public governance The 1997 Asian crisis has
