P. Moreland,Stephen C. Meyer,Christopher Shaw,Ann K. Gauger,Wayne Grudem,2020-06-20 Winner of the ECPA Book of the Year Award for Bible Reference Works Many prominent Christians insist that the church must yield to contemporary evolutionary theory and therefore modify traditional biblical ideas about the creation of life They argue that God used albeit in an undetectable way evolutionary mechanisms to produce all forms of life Featuring two dozen highly credentialed scientists philosophers and theologians from Europe and North America this volume contests this proposal documenting evidential logical and theological problems with theistic evolution making it the most comprehensive critique of theistic

evolution yet produced Explains why theistic evolution is not congruent with a biblical worldview Features nineteen essays written by well known experts in their fields Designed to be used as a textbook for courses on religion and evolution Accessible for those without expertise in the subject **Myth-Busting in Science and Religion** Jim Slagle, 2025-07-14 Science and religion is one of those subjects where everyone knows a lot of things that just ain't so This is because of the numerous urban legends about how the two fields have interacted historically and how they do so today These false beliefs are ubiquitous in Western civilization especially in academia prompting many people to oversimplify the issues This book corrects many of these urban legends and confusions involving premodern cosmology the alleged persecution or even martyrdom of scientists for discoveries that challenged the religious status quo the history and nature of biological evolution the potential discovery of rational extraterrestrial life and whether miracles would somehow conflict with the laws that science has discovered As one might expect reality turns out to be much more complex than the stories suggest

Interdisciplinary Interpretation Kenneth A. Reynhout, 2013-06-20 The past fifty years has seen the emergence of an energetic dialogue between religion and the natural sciences that has contributed to a growing desire for interdisciplinarity among many constructive theologians However some have also resisted this trend in part because it seems that the price one must pay for such engagement is much too high Interdisciplinary work appears overly abstract and methodologically restrictive with little room for systematic theologians self consciously operating within a particular historical tradition In *Interdisciplinary Interpretation* Paul Ricoeur and the Hermeneutics of Theology and Science Kenneth A Reynhout seeks to address this concern by constructing an alternative understanding of interdisciplinary theology based on the hermeneutical thought of Paul Ricoeur generally recognized as one of the most interdisciplinary philosophers of the twentieth century Appealing to Ricoeur's view of interpretation as the dialectical process of understanding through explanation Reynhout argues that theology's engagement with the natural sciences is fundamentally hermeneutical in character As such interdisciplinary theologians can faithfully borrow meaning from the sciences through a process of interdisciplinary interpretation a process that can honestly attend to the legitimate challenges posed by the natural sciences without automatically requiring the evacuation of theological norms and convictions Reynhout's creative appropriation of Ricoeur's hermeneutics succeeds in providing a novel interdisciplinary vision not only for theology but also for interdisciplinary work in general Science and Christianity: Close Partners or Mortal Enemies? Dave Armstrong, 2012-02-13 It's very fashionable nowadays to assert that Christianity and science are antithetical or that God has been ruled out of science or disproven particularly by Darwinian evolution or that science is based on reason and evidence whereas religion being faith based supposedly cares little or nothing for same or that one cannot consistently be a Christian and also a real scientist I shall contend that not only are science and Christianity completely compatible but that modern science would not have even gotten off the ground if it hadn't been for medieval scholastic Catholic thought I shall demonstrate that the foundations of

modern science in the 16th century were overwhelmingly Christian and theistic The notion that science and religion are fundamentally incompatible is ludicrous and would obliterate science at its very roots Includes mini biographies of 293 scientists and a chart of 115 scientific fields of study founded or extraordinarily advanced by Christian or theistic scientists
